B. B. Dorr,

*Controller of Examinations.*

**Calcutta University.**

Senate House, the 21st June 1940.

**NOTIFICATION No. Misc. R. 18.**

It is hereby notified for general information that the following changes in the Regulations of this University relating to the syllabus in Physics for the M.A. and M.Sc. Examinations have been sanctioned:—

**Revised Syllabus in Pure Physics for the M.A. and M.Sc. Examinations.*****Pure Physics.***

Candidates in Physics will be expected to possess a sound knowledge of the general principles of the subject including the more fundamental advances made of recent years and a detailed knowledge of a special selected topic as indicated below:—

Five theoretical papers shall be set of which the first three shall cover a general course of Mathematical and Experimental Physics distributed as follows:—

Paper I—Heat and General Physics.

Paper II—Light and Acoustics.

Paper III—Electricity and Magnetism, Electron Theory of Matter.

Paper IV—Modern Physics (Principle of Relativity), Wave Mechanics and Elements of Nuclear Physics.

The detailed syllabus of the subjects mentioned in the first four papers stated above will be framed by the Board of Higher Studies in Physics, which may be modified by the same Board when occasion will arise.

**Paper V.**

The fifth paper shall be set on a special topic of which the candidate is expected to possess a detailed knowledge.

Appended is a list of such topics which may be added to or modified from time to time by the Board of Higher Studies in Physics—

- (a) Electrical Communication and Radio.
- (b) X-Rays and Structure of Matter.
- (c) Advanced Optics (including Spectroscopy).
- (d) Advanced Acoustics.
- (e) Astrophysics and Generalized Relativity.
- (f) Nuclear Physics.
- (g) Geophysics.

The practical examination shall consist of three parts. The first part shall be so conducted as to test the candidate's general proficiency in Physical Experiments and Measurement. The second and third parts shall test his proficiency in advanced Physical Experiments and his practical knowledge of the special subjects offered by him for the fifth theoretical paper.

The laboratory note-books of the candidates shall carry 20 per cent. of the full marks in practical papers. They shall be inspected at frequent intervals and marked periodically by the teachers under whom the candidates worked at the different laboratories. These marks will be considered by examiners at the time of finally adjusting the marks in each practical test. If the laboratory note-books are found to be unsatisfactory, the candidates will be disqualified for the examination. In connection with the practical examination there shall be also a special *viva voce* examination of the candidate on the subject of the experiment, which will carry 20 per cent. of the full marks allotted to that question.

Candidates who have taken their B.Sc. Degree with Honours in Physics or Mathematics may be permitted to offer a piece of research work in lieu of the fifth theoretical paper. Before such permission is granted the candidate will be required to produce a duly certified laboratory record and satisfy the Board of Higher Studies in Physics by appearing at a practical test or otherwise, that he has during the first year's course of study diligently carried out a course of practical work. The production of thesis will then exempt him from any further practical examination. The maximum marks allotted to the research work shall be 300, and 100 marks shall be allotted to the special *viva voce* examination of the candidate on the subject of his thesis.

The above changes will be given effect to from the session 1940-41.

J. CHAKRAVORTI, Registrar.

**THE BENGAL REVENUES (CHARGED EXPENDITURE)

**A  
BILL**

*to declare certain expenditure to be expenditure charged upon  
the revenues of the Province.*

butions to be

2. The contribution payable by the Provincial Government under each enactment specified in the first column of the First Schedule to this Act, or so much of such contribution as is specified in the corresponding entry in the third column of the said Schedule, is hereby declared to be expenditure charged upon the revenues of the Province.

Certain grants  
to be made and  
charged.

3. (1) In respect of each enactment specified in the Second Schedule to this Act, the Provincial Government shall, in such manner, and by such date as it may determine, make in each year from provincial revenues, a grant approximately equal, in the opinion of the Provincial Government, to the net sum which, by virtue of the provisions of section 136 of the Government of India Act, 1935, and of the Government of India (Adaptation of Indian Laws) Order, 1937, would have been payable in that year to provincial revenues under that enactment and which, but for the said provisions, would have been payable in that year to a local authority. 26, Geo. 5, Ch. 2.

(2) All grants payable under the provisions of sub-section (1) are hereby declared to be expenditure charged upon the revenues of the province.

(3) The Provincial Government may, by notification in the *Official Gazette*, include in, or exclude from, the Second Schedule any appropriate enactment.

**STATEMENT OF OBJECTS AND REASONS.**

1. The contributions payable by the Provincial Government under the enactments specified in the First Schedule to this Bill were non-voted under the late Constitution under the terms of sub-section (iii) of section 72D of the Government of India Act, 1919, which exempted from vote all items of expenditure of which the amount was prescribed by or under any law. On the introduction of the present Constitution it was laid down in paragraph 4 of the India and Burma (Transitory Provisions) Order, 1937, that the expenditure should continue to be non-voted (or as it is now called "charged") up to the 31st March, 1939. On the expiry of this date the expenditure became voted. It is incongruous that payments prescribed by Statutes passed by the Legislature should be subject to annual vote and it is proposed to declare these items of expenditure as charged upon the revenues of the Province by legislative enactment under section 78(3)(g) of the Government of India Act, 1935.

2. Before the 1st April, 1937, fines, taxes, etc., levied under the enactments specified in the Second Schedule to this Bill were credited directly to the funds of the local bodies concerned. As a result of the modifications made in these enactments by the Government of India (Adaptation of Indian Laws) Order, 1937, these fines, taxes, etc., now form part of the revenues of the Province and are credited to Government. It is not intended, however, that local bodies should lose these proceeds which are a part of their normal resources. It has accordingly been decided to make compensatory grants to local bodies in lieu of the amounts of which they are being deprived. In this view it is considered unnecessary to submit these payments to the annual vote and it is proposed to make them charged upon the revenues of the Province by legislative enactment under section 78(3)(g) of the Government of India Act, 1935.

**RESOLUTION—No. 1635F.**

*Calcutta, the 8th July 1940.*

The Government of Bengal have had under consideration for some time past the question whether it is necessary to give some form of relief to low-paid Government servants to assist them in meeting the difficulties which may result from a substantial rise in the cost of living caused by the war.

In the opinion of Government such rise in the cost of living as has occurred so far has not called for the grant of relief, but Government consider it desirable that a scheme should be in readiness.

2. The pays of the classes of Government servants to whom relief may become necessary were last revised in 1921 and the revision then made absorbed the grain compensation allowances given after the Great War of 1914-18. These pays have not been reduced since the time of the high prices that prevailed in the early "twenties" and it might be argued that there is no ground for considering the grant of relief until prices have risen materially above the levels prevailing when the pay scales were fixed.

On the other hand it seems probable that during the long period of low prices, standards of living have been adjusted to the lower levels of prices and to postpone the grant of relief until prices rise above the high levels of 1920 would entail hardship.

Government consider that the fairest course will be to grant assistance when the price of the cheapest common rice rises substantially above the average price during the 12 months immediately preceding the outbreak of war.

There is a close relation between variations in the price of rice in Calcutta and in the districts and for the sake of simplicity it has been decided to adopt the price of the cheapest common rice in Calcutta as published fortnightly in the *Calcutta Gazette* as the determining factor in the scheme for the grant of the grain compensation (or dearness) allowance. The average price of such rice in Calcutta during the 12 months immediately preceding the outbreak of war was 10 seers 13 chataks a rupee. Government have decided that a rise in price to 8 seers per rupee (which is about 25 per cent. above the average of the 12 months ending August 1939) shall bring the scheme into operation.

3. The following rules will govern the grant of the grain compensation allowance admissible under this resolution:—

I. A grain compensatory allowance at the rate of Re. 1 per mensem will become payable to all Government servants in receipt of emoluments of Rs. 30 or less a month on the issue of a special order of Government.

II. Such order will be issued when the price of the cheapest common rice in Calcutta rises to 8 standard seers per rupee and remains at or above that level for three months.

III. When the allowance admissible under this Resolution has once become payable, the position will be reviewed monthly and the allowance will continue so long only as the average price during the preceding three months is 8 seers a rupee or dearer.

IV. The words "Government Servants" in rule I include—

- (a) all persons who are in the whole-time employ of Government whether in a permanent or a temporary capacity or paid at piece-work rates;
- (b) menials paid from contingencies; and
- (c) members of work-charged establishments.

V. The term "emoluments" in rule I includes the amount drawn monthly by a Government servant as pay, special pay, personal pay, overtime allowances and pension. House-rent allowance or the value of free quarters in lieu thereof shall not be taken into account for the purpose of calculating emoluments.

VI. Government servants on leave (other than extraordinary leave) will draw the allowance at the same rate as would have been admissible to them had they not been on leave, whether the leave is on average pay or half or quarter average pay.

**RESOLUTIONS.**

Simla, the 10th June 1940.

No. 260-T.—The Government of India have already announced that they are prepared to consider the question of assuring specified industries, the starting of which is considered essential under conditions created by the war, of such measure of protection against unfair competition from outside India after the war as may be necessary to enable them to continue their existence. A request for such an assurance has been received from a firm anxious to reopen a factory for the manufacture of steel pipes and tubes up to a nominal bore of four inches. In view of the fact that such pipes and tubes are largely used in connection with water supplies, the maintenance of which is of great importance to Government Departments, including the Defence Department, the Government of India have decided to give the desired assurance to all who wish to undertake their manufacture. It is understood that the pipes and tubes in question are likely to be made from imported steel in present condition and the assurance given will hold good even though imported steel may continue to be used for the purpose until such time as supplies of indigenous steel become available.

**TARIFFS.**

The 22nd June 1940.

No. 458-T.(1)/40.—In their Commerce Department Resolution No. 458-T.(14), dated the 22nd June 1935, the Government of India decided to afford the glass manufacturing industry in India a certain measure of relief by exempting imported soda ash from duty. This concession was sanctioned for a period of three years in the first instance and was extended up to the 22nd June 1940 under the Commerce Department Resolution No. 458-T.(1), dated the 16th April 1938.

2. The production of soda ash on a commercial scale has not yet developed in India but two industrial concerns have made considerable progress with their schemes for the production of indigenous soda ash on a large scale. In the meantime the arrangements announced in paragraph 5 of the Resolution, dated the 22nd June 1935, are being continued for a further period of two years or (if this is earlier) until the Government of India are satisfied that soda ash in commercial quantities is being produced in India. The situation will then be further reviewed.

ORDERED that a copy of this Resolution be communicated to all Provincial Governments, all Chief Commissioners, the several Departments of the Government of India (including Financial Adviser, Military Finance and Financial Adviser, Communications), the Political Department, the Private and Military Secretaries to His Excellency the Viceroy, all heads of Departments and officers subordinate to the Department of Commerce, the Central Board of Revenue, the Auditor General, the Chief Auditor, Indian Stores Department, the High Commissioner for

India, His Majesty's Trade Commissioner in India, the Canadian Trade Commissioner in India, all the Chambers of Commerce and Associations, the French Trade Commissioner in India, Burma and Ceylon and the Government of Burma.

ORDERED also, that the Resolution be published in the Gazette of India for general information.

(2) Where the design of a cylinder does not provide for the valve lying wholly below the level of the body of the cylinder, a stout metal cap or metal cover securely attached to the cylinder body shall be provided, the design being such that the cap or cover is nowhere in close proximity to any part of the valve or valve body.

(3) Every valve cap or cover on a cylinder which does not contain hydrocyanic acid shall be provided with a vent of such size as to prevent any gas pressure inside cap or cover.

(4) Nothing in sub-rules (1), (2) and (3) applies to cylinders containing oxygen for medical purposes or nitrous oxide, and having a water capacity not exceeding ten pounds (10 lbs.).

16. *Transport of cylinders.*—(1) Cylinders shall be so transported as not to project beyond the sides or ends of the vehicles in which they are transported.

Any such order may be revoked at any time.

18. *Notice of accidents.*—Whenever there occurs in or about, or in connection with, any place where compressed or liquefied gas cylinders are handled, stored or transported, any accident in any way connected with such cylinders attended with loss of human life or serious injury to person or property, or of a description usually attended with such loss or injury, the occupier of the place, or the person in charge of the vehicle, as the case may be, shall forthwith give notice thereof to the officer in charge of the nearest police station and the Chief Inspector.

(See Rule 4.)

*Specifications for the construction of gas cylinders and their valves and other fittings and tests for such cylinders.*

1. Cylinders for gases which at the usual working temperature and pressure remain in a gaseous state in the cylinder shall conform in every respect with the tests and requirements laid down in British Standard Specification No. 399/1930 or No. 400/1931. Each cylinder when ready to be put into service shall be subjected to a hydraulic stretch test, preferably by the "water-jacket" method, and the proof pressure applied

\*The "water-jacket" method is that in which the cylinder is enclosed in a vessel filled with water and which is fitted with a gauge glass projecting from its upper cover. The changes in volume of the cylinder on applying and after removal of the internal hydraulic pressure are measured by the changes in level of the water in the gauge glass.

in this test shall be 3,000 lbs. per square inch. No pressure greater than the working pressure shall have been applied to any cylinder before the test. The permanent stretch shown by the test shall not exceed 10 per cent. of the total stretch under the test pressure.

2. Cylinders for gases which are generally reduced to the liquid condition by the pressures used in charging them into the cylinders shall conform in every respect with the tests and requirements laid down in British Standard Specification No. 401/1931. Each cylinder when ready to be put into service shall be subjected to a hydraulic stretch test preferably by the "water-jacket"\* method and the proof pressure applied in this test shall be the value of  $P$  calculated from the formula  $P = 2ft/D - t$  where  $D$  is the outside diameter of the cylinder in inches,  $t$  is the thickness of the wall in inches and  $f$  has the value of 33,600 pounds per square inch. The test pressure for cylinders for carbon dioxide, nitrous oxide and ethylene is 3,360 lbs. per square inch in all cases. No pressure greater than the working pressure for which the cylinder is designed shall have been applied to the cylinder before the test. The permanent stretch shown by the test shall not exceed 10 per cent. of the temporary stretch under the proof pressure. Test pressures, in pounds per square inch to the nearest 10 pounds per square inch calculated from the formula are:

Cylinders manufactured prior to 1st September 1931 may be made of wrought iron or lap welded or seamless steel containing not more than 0.25 per cent. of carbon and not less than 99 per cent. of total iron, the ultimate stress of the steel being not less than 26 tons per square inch and not more than 33 tons per square inch and the ultimate elongation not less than 1.2 inches on a test piece of 8-inch gauge length cut from a finished cylinder.

4. Valve fittings for cylinders shall comply in all respects with the specification for valve fittings for gas cylinders set out in the British Standard Specification No. 341 of 1931 and from the 11th May 1942 the valve fittings for cylinders for Carbon Dioxide shall be provided in the body of the fitting with a safety release consisting of a softened copper disc so arranged as to burst at a pressure between 2,600 and 2,850 pounds per square inch.

\*The "water-jacket" method is that in which the cylinder is enclosed in a vessel filled with water and which is fitted with a gauge glass projecting from its upper cover. The changes in volume of the cylinder on applying and after removal of the internal hydraulic pressure are measured by the changes in level of the water in the gauge glass.

When the valve of a cylinder is wholly protected by an extension of the cylinder body the identification colour band adjacent to the valve shall be painted on the extension both internally and externally, and when two identifying bands are required, in such cases the second band shall be painted immediately below the first band on the external surface of the cylinder. (See Fig. I.)

For cylinders for medical purposes, the name or chemical symbol of the gas shall be stamped, stencilled or painted on or near the shoulder of the cylinder. In the case of coir covered cylinders the name or chemical symbol of the gas shall also be stamped on a metal tag attached to the covering.

Any other distinguishing bands or marks, painted on the cylinder by the gas manufacturer or filler for his own purposes, shall be placed on the body of the cylinder. The neck of the cylinder may have a painted aluminium panel to show up the marking.

For gases other than those provided for in Tables I and II, the cylinders shall be specially labelled indicating the nature of the contents.

An Act to provide, during twelve months, for the discipline and regulation of the Army and the Air Force.

[25th April 1940.]

WHEREAS the raising or keeping of a standing army within the United Kingdom in time of peace, unless it be with the consent of Parliament, is against law:

And whereas it is adjudged necessary by His Majesty and this present Parliament that a body of land forces should be continued for the safety of the United Kingdom and the defence of the possessions of His Majesty's Crown, and that the whole number of such forces should consist of such number as His Majesty may deem necessary:

And whereas it is also judged necessary for the safety of the United Kingdom and the defence of the possessions of this realm that a body of Royal Marine forces should be employed in His Majesty's fleet and naval service under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid,

And whereas the said marine forces may frequently be quartered or be on shore, or be sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the government of His Majesty's forces by sea:

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm, by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm; yet, nevertheless, it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law or to the Air Force Act, in their duty, that an exact discipline be observed and that persons belonging to the said forces who mutiny, or stir up sedition, or desert His Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military or air force discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow:

(1) When any immovable property in the possession of any person has been sold after the ninth day of April, 1936 in execution of a decree of a Civil Court or a certificate under the Bengal Public Demands Recovery Act, 1913 relating to a debt, such person or his heir, executor or administrator may apply for relief under this section, if the following conditions are fulfilled, namely :—

Ben. Act  
III of  
1913.

- (a) if, on the date of the sale, such person was a debtor,
- (b) if the sale was held, either before an appointment was made under sub-section (2) of section 3 in relation to the Board established for the local area in which the property is situated, or notwithstanding the issue by such Board of a notice under section 34, and
- (c) if the property sold was in the possession of the decree-holder on the twentieth day of December, 1939, or was alienated by the decree-holder before that date in any manner otherwise than by a registered instrument and by a *bona fide* transfer for valuable consideration or by a *bona fide* gift.

(2) The application referred to in sub-section (1) shall be made to the Board established for the local area in which the property is situated and within one year from the date of the commencement of the Bengal Agricultural Debtors (Second Amendment) Act, 1940; and the Board shall first determine whether the application fulfils the conditions specified in that sub-section and whether it can be entertained.

(3) No Board shall entertain an application made under sub-section (2) if such application relates to a debt in respect of which an application has been previously made to, and entertained by, a Civil Court under the provisions of the Bengal Money-lenders Act, 1940; and no Civil Court shall entertain an application made under the provisions of that Act if it relates to a debt in respect of which an application has been previously made to, and entertained by, a Board under the provisions of this section.

(4) If the Board decides that an application made under sub-section (2) fulfils the conditions specified in sub-section (1) and can be entertained by it, and if, within such period as the Board may allow, the applicant and the decree-holder do not effect an amicable settlement of the debt, the Board shall, in such manner as may be prescribed, estimate the average annual gross receipts deemed to have been derivable from the property sold during the period beginning on the first day of January, 1934 and ending on the thirty-first day of December, 1938.

(5) After making the estimate referred to in sub-section (4), the Board shall make an award, directing the applicant to pay annually and in cash to the decree-holder, one-half of the value of such average annual gross receipts, until the debt is extinguished or until twenty years have expired from the date of the award, whichever is earlier.

(6) For the purposes of an award made under sub-section (5) the debt shall be deemed to be the amount covered by the decree or certificate in execution of which the property was sold, and after such an award has been made, the applicant shall be deemed to be a debtor.

*The Bengal Agricultural Debtors (Second Amendment) Bill,  
1940.*

(Clauses 6, 7.)

(7) The debtor may present a copy of the award made under sub-section (5) to the Civil Court or Certificate-Officer at whose order the property was sold, and such Court or Certificate-Officer shall thereupon direct that the sale be set aside, that the debtor be restored to possession of the property with effect from the first day of *Baisakh* next following, and that any person who is in possession of the property shall be ejected therefrom with effect from that date.

(8) A debtor who has been restored to possession of any property under sub-section (7) shall not, so long as there remains unpaid any sum payable under an award made under sub-section (5) or until the expiration of twenty years from the date of such award, whichever is earlier, alienate by sale, lease, gift or other form of transfer, or create any charge upon, such property or any portion thereof.

(9) The provisions of sections 28 and 29 shall, so far as may be, be applicable to the failure by the debtor to pay by the date fixed any sum payable under an award made under sub-section (5).

(10) When the debt is extinguished, or when twenty years have expired from the date of the award made under sub-section (5), or when such award ceases to subsist under sub-section (5) of section 29, whichever is earlier, the decree or certificate in execution of which the property was sold shall be deemed to have been fully satisfied.

(11) In this section the expression 'decree-holder' includes any person to whom any interest in the decree is transferred by assignment in writing or by operation of law."

Amendment  
of section 40.

6. In the proviso to sub-section (1) of section 40 of the said Act, after the figures "29" the words, figures and letter "or any order or award made by a Board under section 37A" shall be inserted.

Amendment of  
section 55.

7. After clause (y) of sub-section (2) of section 55 of the said Act the following clause shall be inserted, namely:—

"(ya) the forms of application under sub-section (2) of section 37A, and the manner of making the estimate referred to in sub-section (4) of that section ;".

**STATEMENT OF OBJECTS AND REASONS.**

Apprehensions aroused among landlords and creditors by discussions of the terms of the Bengal Agricultural Debtors Act, 1935, at the time of its passage through the Legislature, prompted many of them to take hurried action towards obtaining decrees in pending suits and towards executing them before such action could be stayed. Consequently a large number of debtors lost their holdings through sales in execution of decrees before they were able to have recourse to any Debt Settlement Board for relief; and in a number of cases Civil Courts held and confirmed sales in execution of decrees in spite of the issue of a notice under section 34 of the Act.

The main object of this Bill is to provide a machinery for restoration of such holdings to as many as possible of their former possessors, subject to the payment of proper compensation to the decree-holder.

A subsidiary object is to place the Calcutta High Court outside the general scope of the Act, and to make special provisions for the procedure to be adopted as regards, and the effect of, appellate and revisional applications to, and proceedings in, the High Court when such applications and proceedings relate to debts which are the subject of applications made to Boards.

**BENGAL LEGISLATIVE ASSEMBLY  
DEPARTMENT.****NOTIFICATION.**

No. 3013L.A.—9th July 1940.—The following report of the Select Committee on the Bengal Agricultural Produce Markets Bill, 1939, with the Bill embodying amendments recommended by the Committee, is hereby published under their recommendation for general information.

**Report of the Select Committee on the Bengal Agricultural Produce  
Markets Bill, 1939.**

We, the members of the Select Committee to which the Bengal Agricultural Produce Markets Bill, 1939, was referred by a motion carried in the Bengal Legislative Assembly on the 19th December, 1939, have the honour to submit this our report with the Bill embodying amendments recommended by us annexed. Matter recommended by us to be omitted has been printed in *italics* and enclosed in square brackets and new matter recommended to be inserted has been underlined.

2. The Committee met for the first time on the 30th January, 1940, and from time to time thereafter till the 27th June, 1940, on which date they concluded their deliberations on the Bill.

3. The Bill was published before introduction in the *Calcutta Gazette* of the 6th July, 1939. The Bill has, in our opinion, been so altered by our recommendations as to require republication.

4. The reasons for the changes recommended by us, excepting those of a mere drafting or consequential nature, are briefly as follows:—

**Clause 1.**

*Sub-clause (2).*—Exclusion of Calcutta from the operation of this Act is, in our opinion, likely to affect the proper administration of the Act even in the mufassil. We have, therefore, recommended the application of the Act to the whole of Bengal without such exclusion.

**Clause 2.**

*Sub-clause (1)(ii).*—The definition of "agriculturist" has been expanded to make the intention clear. Our main object is to include the tillers of the soil.

(iv) We have expanded the definition of the "local authority" to cover all similar authorities functioning in the province.

(viii*a*) We have considered it desirable to insert this definition in view of the alterations made in the body of the Bill.

(viii*b*) "Rules" have been defined to avoid any possible misinterpretation.

(ix) The slight alterations here have been introduced for the purposes of including owners and keepers of warehouses and excluding persons other than *bonâ fide* agriculturists dealing with their own produce.

**Clause 3.**

We have amended this clause so as to place both the existing markets and markets that may come into existence after the enforcement of this Bill on the same footing in relation to registration and renewal thereof. In both the cases we thought that renewal of registration every three years would be more suitable for the purpose of this Act. While leaving the actual fee for original registration to be fixed by the administrative Government, we considered it desirable to fix the maximum limit of such fees at Rs. 5. A renewal fee of Re. 1 was considered by us adequate.

**Clause 4.**

*Sub-clause (b).*—The amendment here is of a drafting nature.

**Clause 4A.**

In this new clause we have thought it expedient to give the Government power to classify the various kinds of agricultural produce into different grades to facilitate their proper marketing and for providing some reasonable standard for checking the adequacy of prices.

**Clause 5.**

*Sub-clause (1).*—We have made an additional provision fixing the liability of supplying information on traders along with the owners of markets as in most cases they are likely to be in a better position to supply materials which may be necessary for control of the market.

*Sub-clause (2).*—By this new sub-clause we have made obligatory on the owners and traders to produce their books of accounts when required by authorised persons as a guard against possible suppression of fact.

**Clause 6.**

*Sub-clause (2).*—The object of expansion of the clause was to make the purpose of the clause unambiguous.

**Clause 7.**

*Sub-clause (1).*—We have thought it expedient to exempt the market committee from the restriction imposed by this sub-clause.

*Sub-clause (2).*—The original sub-clause was considered insufficient. The redrafted sub-clause (2) is intended to provide more elaborate details of procedure to be adopted in relation to the issue of licences to eligible persons and owners.

*Sub-clause (4).*—We have provided in this sub-clause that reasons for suspension or cancellation of the licence must be recorded in writing. This is intended to supply materials for consideration when an appeal is preferred under sub-clause (5).

*Sub-clause (5).*—This new sub-clause giving a right of appeal to any person aggrieved by an order of suspension or cancellation of licence under sub-clause (4) was considered desirable as a remedy against possible grievance against the decision by any officer appointed by Government.

*Sub-clause (6).*—Here we have supplied an omission by a provision for renewal of licences issued under sub-clause (2).

**Clause 8.**

We have omitted this clause as we did not think any provision for compensation necessary or desirable.

**Clause 9.**

*Sub-clause (1).*—We have here provided for inspection and supervision of the work of marketing committees in such a way as may be prescribed by rules as we thought some sort of safeguard necessary at any rate, at the initial stages of the working of these committees.

*Sub-clause (2).*—The original sub-clause (2) has been omitted and the subject matter put in the redrafted sub-clause in a more detailed form making clear provisions separately for urban and municipal areas. In suggesting representations of various persons in the market committee, we had in view the interest of everybody concerned in the welfare of the market including the agriculturists in particular. We believe that our suggestion, if accepted, will put the committees on a sound footing.

*Sub-clause (3).*—We have amended this sub-clause to make it clear that in cases of default in election from any particular group the necessary appointment shall be restricted to persons belonging to the particular group for which the default has occurred.

*Sub-clause (4).*—The proviso here has been inserted to supply an omission. In case of default in the election of the Chairman or Vice-Chairman the best way to fill up the offices would be by appointment by the Provincial Government and we have inserted the proviso accordingly.

#### Clause 10.

*Sub-clause (1).*—Has been redrafted. We have provided for tender of resignation in writing and acceptance of such resignation by the Committee to create a vacancy in the seat of a member or the office of the Chairman or Vice-Chairman. This, we thought would lead to uniformity of practice and avoid misrepresentation.

*Sub-clause (2).*—In this we have made an additional provision that absence from six consecutive meetings without leave would make a member liable to be removed from the Committee as such absence would usually betray lack of interest in the absentee. We have however provided that in any case of proposed removal, the member should be given an opportunity of being heard.

*Sub-clause (3A).*—This new clause has been introduced to provide for the election or the appointment of the Chairman or Vice-Chairman when the office is vacant by resignation, removal or death. The same procedure as in the case of original election or appointment has been recommended.

#### Clause 12.

We have increased the number of members necessary for a Sub-Committee to be appointed under this clause from one to three. We did not think any delegation of powers to Sub-Committees desirable. On the other hand, it has been considered desirable to provide for the approval of the proceedings of such Sub-Committees, by the Market Committee itself, for the purpose of giving effect to any of its recommendations.

#### Clause 13.

The clause has been recast with certain additional and necessary provisions regarding issue, suspension and cancellation of licences for the purposes of establishment and regulation of markets. While we have given the Committee power to suspend or cancel licences for breach of its conditions, we have made it incumbent upon them to hear the party concerned in a proceeding for suspension or cancellation of his licence and to record the reasons for the orders in such cases. We have further provided for appeals against such orders to allow the aggrieved party another reasonable opportunity of being heard.

*Sub-clause (4).*—This is new. We have considered it necessary to provide for renewal of licences issued by Market Committees, annually.

#### Clause 14.

The original clause 14 has been thoroughly revised and expanded in the substituted clause.

In sub-clause (1) we have clearly defined the powers of the Committee in the matter of levy of fees. This power has been made subject to the control of the administrative Government by rules. The local Government have also been authorised to impose limitations and permit exemptions if and when necessary in the interest of petty sellers or for any other sufficient reason.

In sub-clause (2) we have provided for giving the owner of every market 5 per cent. of the total fees realised after deduction of costs and realisations from persons from whom the landlords are entitled to realise rents.

In sub-clause (3) we have made it clear that the owner of the market would not be entitled to realise anything in respect of agricultural produce except rents for use and occupation of structures in which and lands on which agricultural produce may be stored or brought for sale and in the latter case only when there is a registered agreement.

In sub-clause (4) we have explained the meaning of "owner" and "net total of the fees realised" as used in the sub-clause (2).

#### Clause 16.

We have made a slight alteration in sub-clause (1) giving the Committee wider powers to appoint officers and servants for carrying out all or any of the purposes of the Act. We thought that without such powers it would be difficult for the Committees to function properly.

Sub-clause (2) has been omitted and clear provisions have been made in the substituted sub-clauses (2) and (3) regarding the circumstances under which and conditions on which services of Government Officers may be lent or transferred to the Committee.

#### Clause 17.

The proviso to sub-clause (1) has been introduced as a desirable safeguard.

#### Clause 19.

*Sub-clause (2).*—This sub-clause has been amended to make it clear that the appointment of any special or additional staff for the services of the Committee must if, necessary, be requisitioned by the Committee itself and not imposed upon it by any external agency and that the necessary expenses should be met from the market fund.

#### Clause 20.

The amendments in this clause have been made with a view to give the Committee all reasonable powers for the proper administration of the markets in their charge. The amendment in (iii) is consequential.

#### Clause 21.

The alteration here is of a drafting nature.

#### Clause 23.

*Sub-clause (1).*—The latter portion of the sub-clause has been redrafted with an additional provision that no Committee shall be superseded for a period exceeding one year. The amendments in sub-clause (2) are intended to make the procedure, relating to management of the Committee during the period of supersession, clear and definite.

*Sub-clauses (4) and (5)* have been omitted as we did not consider any transference of powers or assets to any local authority necessary or desirable and further as the modified provision made in this clause are likely to serve the purpose for which such transfer was originally contemplated.

**Clause 24.**

The amendments in this clause are merely consequential on the alterations made in the substantive clauses of the Bill.

In sub-clause (3) we have reduced the maximum limit of the penalty under this clause as the original maximum appeared to us to be excessive.

**Clause 25.**

*Sub-clause (1) (ia)* has been inserted for facility of preventing abuse in relation to weights and measures.

*Sub-clause (2).*—As we thought that the provision of statutory previous publication of the bye-laws might bring in delay and complication we have left the matter to be settled by rules that may be framed by Provincial Government. It is expected that Government will consider any matter that may be brought to their notice in this connection.

**Clause 26.**

Item 4A in the table was necessitated by the insertion of the provisions in the new clause 4A.

In item 5 we have added the word "wilful" to exclude *bonâ fide* mistakes or omissions resultant on unforeseen circumstances.

NOTE—(1) The signature of Mr. J. W. R. Steven, M.L.A., had not been received till the time of printing this report.

(2) Mr. Surendra Krishna Roy Chowdhury has since ceased to be a member of the Assembly.

**Minute of dissent by the Hon'ble Mr. Tamizuddin Khan.**

My signature to the report of the Select Committee does not connote my acceptance of the following changes made in the Bill:—

- (1) The inclusion of Calcutta as defined by clause 11 of section 3 of the Calcutta Municipal Act, in clause 1(2) of the Bill.
- (2) The omission of original clause 8 providing for compensation to owners of markets in notified market areas.
- (3) The provision for the levy of fees and payment of compensation in clause 14.
- (4) The provisions for the supersession of the Committee and for the performance of its functions and for the constitution of a new Committee in clause 23.

**Minute of dissent by Mr. C. Morgan, C.I.E., M.L.A.**

I am not opposed to the regulation of the marketing of agricultural produce in principle, but I consider that the Bill in its present form is a mere framework in that many of its most important objects are to be carried out by rules prescribed by the Provincial Government. Therefore I consider that the Bill should only be utilised in an experimental manner until its value to the agriculturist and the trader has been clearly demonstrated.

. . . . .

I note below my dissent from several provisions of the Bill as they have emerged from the Select Committee.

*Clause 1(2).*

I dissent from the application of the Bill to markets in Calcutta. Under the Calcutta Municipal Act, 1923, the Corporation of Calcutta have full powers to regulate markets in Calcutta and the inclusion of these markets within the scope of the Bill is unnecessary and can only lead to a conflict of jurisdiction.

*Clause 2.*

*Definition of "market" [sub-clause (1)(r)].* The buying and selling of agricultural produce by merchants and buyers by private treaty on their own premises should be expressly excluded from this definition.

*Clause 6.*

The object of this Bill is to regulate the marketing of agricultural produce, not to fix prices or prohibit the purchase and sale of any agricultural produce. I therefore consider (a) that for the words "control the purchase and sale of such agricultural produce" occurring in lines 2 and 3 of sub-clause (1) the words "regulate the marketing of such agricultural produce" should be substituted and (b) that the words "and prohibit in the whole or any portion of such notified market area the purchase and sale of all or any of the agricultural produce notified under this sub-section" occurring at the end of sub-clause (2) should be omitted.

*Clause 7.*

I consider—

- (1) that the fee for the issue or renewal of a licence under this clause should be specified;
- (2) that at least the general principles of the conditions which it is proposed to attach to licences should be specified;
- (3) that the rank of the official to whom the powers of cancellation or suspension of a licence may be given should be specified.

*Clause 9.*

*Sub-clause (6).*—A time-limit should be placed on the period during which an elected or appointed member may continue to hold office after the expiry of his term of office.

*Clause 13.*

(a) The position of existing markets and haats in notified areas where new markets are established by Market Committees should be clarified.

(b) The fee payable for licences issued to traders and other persons should be specified in this clause, and the general principles of the conditions to be attached to these licences should also be specified.

*Clause 14(1)(a).*

I consider that the power to levy fees should be permissive and that the word "may" should be substituted for the word "shall". I also consider that fees should only be levied on agricultural produce bought or sold in a notified market area.

*Clause 20.*

*Sub-clause (v).*—The expenses of and incidental to election of members of the Market Committees should not be paid out of the Market Fund.

*Clause 25.*

*Sub-clause (1)(ii).*—I consider that this power is too wide and indefinite.

*Sub-clause (1)(iii).*—I consider that it is impracticable to prescribe hours for weighing or measuring agricultural produce.

I reserve the right to move any amendments to the provisions of the Bill that I consider proper.

**Minute of dissent by Mr. Madhusudan Sarkar, M.L.A.**

The Bill suggests inclusion of all "fairs" without exception in the definition of Market, *vide* clause 2 (r), and the Committee also retains it. But in my opinion it will not be reasonable to include all fairs without exception.

Fairs generally held on some particular private places once a year temporarily for a short period generally in connection with religious festivities should be excluded from the operation of this Act; because the sellers in those "fairs" are generally private persons of the locality as opposed to professional dealers. The people of the place consider these fairs to be part and parcel of their religious performances.

To include this type of "fairs" in the "Market" of this Act is to indirectly restrict the people of the locality from taking part in their religious rites which they are used to do from time immemorial and thereby to interfere with those rites. With this dissention I sign the report.

**Minute of dissent by Khan Sahib Hamiduddin Ahmed, M.L.A., and Mr. Giasuddin Ahmed, M.L.A.**

We are in favour of introducing a provision by way of amendment controlling the prices of the agricultural produce to be dealt with under this law, without which in our opinion no real benefit could be done to the producers thereof. \* \* \* \* \*

2. We object to the control of the purchase and sale of all agricultural produce under one Act. We propose that like many foreign countries our province also should have separate laws for different agricultural produce. We further propose that the few agricultural produce such as jute and paddy which had got great commercial value and the sale proceeds of which form the bulk of the purchasing power of the general body of the agriculturists of this province should be tackled first, and present Bill should deal with them alone. \* \* \* \* \*

**Minute of dissent by Maulvi Muhammad Ishaque, M.L.A., Mr. Giasuddin Ahmed, M.L.A., and Mr. Hamiduddin Ahmed, M.L.A.**

We do not agree to allow the owner of a market to receive both rent and 5 per cent. of the net total of fees realised from the sellers of notified agricultural produce sold in that market as provided in sub-clause (3) of clause 14. In our opinion that would amount to double taxation upon the sellers. So, we propose to amend the said sub-clause (3) of clause 14 by deleting the last portion where the owner of the market has been allowed to get rent in addition to the 5 per cent. of the net total of fees.

We reserve the right to move suitable amendments in respect of the above at proper time and place.

**Minute of dissent by Maulvi Idris Ahmad, M.L.A.**

One of "the main objects of the Bill" is "generally to ensure that the cultivator producer receives a fair deal, a fair price and the whole of the market price *minus* reasonable market charges."

I am afraid that the Select Committee as a whole could not for various reasons give such shape to the Bill as may really fulfil the above objects.

In the first place if the object of the Bill is to improve the wretched lots of the poor agriculturists, by enabling them to fetch better prices for their produce, then there should be a complete list of main agricultural produce of all the districts of Bengal. It will appear from clause 2(7)(i) that while unimportant things like "wool of domestic animals" is included in the list of produce, far more important agricultural produce like silk, lac, tobacco, sugarcane, etc., are not included.

Government is of course empowered to declare any other produce by future notification, but the dilatory process of such Government notification is hardly expected to benefit those agriculturists who are responsible for other agricultural produce than mentioned in the list.

In the second place the establishment and other charges of the Market Committee should not be so high as to necessitate the levy of double charges or higher charges than is made now from the persons concerned. If this happens, the real object of the Bill will be frustrated and although few clerks and persons may be provided with service, the agriculturists of the province will receive this measure as a curse and not as a blessing. I am afraid the present form of the Bill does not provide sufficient safeguard against these anticipated evils.

The levy of Khootagari charges by the agents of zemindars, proprietors and owners of markets or land, for mooring boats, is an oppressive system by which poor agriculturists are very often harassed and this malpractice ought to be either totally abolished or well regulated by its inclusion in the "trade allowances."

In spite of these and other defects of the Bill, there is necessity for such a Bill, and I hope that the Legislative Assembly as a whole will modify the different provisions of the Bill in such a way as will really render it a blessing to the much taxed and much oppressed agriculturists of Bengal.

**Joint minute of dissent by Mr. Surendra Nath Biswas, M.L.A., Mr. Pratul Chandra Ganguli, M.L.A., Mr. Iwar Chandra Mal, M.L.A., and Mr. Khetra Nath Singha, M.L.A.**

We object to the control of the purchase and sale of all agricultural produce under one Act. We propose that like many foreign countries our province also should have separate laws for different agricultural produce. We further propose that a few agricultural produce such as jute and paddy which had got great commercial value and the sale-proceeds of which formed the bulk of the purchasing power of the general body of the agriculturists of this province should be tackled first and that the present Bill should deal with them alone.

2. We enquired about the names of the agricultural produce the purchase and sale of which Government intended to control under this Bill, so that we might give our definite opinion about the different means and methods of separately controlling the

same; but Government had not made up their mind as yet in that respect. We maintain that in the absence of definite information about the agricultural produce which were going to be dealt with under this Bill, we are not able to properly deal with the clauses relating to the establishment of regulated markets, the formation of market committees, the powers and duties of such committees and the levying of different kinds and grades of fees on the different agricultural produce sold and purchased in markets. We also maintain that the market committees would be very expensive bodies if they were to function properly, but their expenses under the provisions of this Bill were to be borne out of a fund to consist of fees levied on the sale of notified agricultural produce and fines to be realised from the offenders against this Bill. If agricultural produce such as jute which had got high commercial value were not dealt with under this law, we are of opinion that the provisions for raising finance for the maintenance of the market committees would do more harm than good to the agriculturists in whose interests this Bill was purported to have been undertaken by Government. In the absence of any definite information in respect of the above, it became difficult for us to deal with many clauses of the Bill as properly as we desired to do.

3. We consider it desirable to introduce by way of amendment a provision for controlling the prices of the agricultural produce to be dealt with under this law, without which in our opinion no real benefit could be done to the producers thereof.

4. We are of opinion that the registration and renewal of registration of all markets in the province and compunction upon the owners and traders of all the markets to supply any information as regards any agricultural produce as they might be required to do under this Bill, without any corresponding benefit being provided for them in the Bill, could only be disliked by the public concerned as a torturous law.

5. In clause 9 we propose that for the purposes of the Bill, the Calcutta Corporation and the Commissioners of a Municipality should act as the Market Committee in Calcutta and the outside municipal areas respectively. We are of opinion that without such a provision there was bound to be conflict of authorities causing the provisions of the Bill unworkable in those areas.

6. In sub-clause (3) of clause 13, we propose that the prescribed authority to whom an appeal should lie must be a servant of the Crown not below the rank of a Deputy Collector.

7. In clause 26, we propose to reduce the punishment provided for in that clause. Our view-point is that as this Bill would not do any appreciable benefit to those for whom it was meant, the punishment should be nominal.

8. When we find that it was not possible to sufficiently improve the Bill to the real benefit of the agriculturists for whom it was meant, we suggest that this Bill might be dropped and some other appropriate measures might be brought before the Legislature at an early date to ensure the maximum possible price for the agricultural produces of the province.

We dissent in many other matters also. We shall move amendments to the provisions of the Bill as we consider fit at the proper time and place.

#### **Further minute of dissent by Maulvi Giasuddin Ahmed, M.L.A.**

The party to which I belong is on principle against nomination of members to any local body. Acting upon that principle I am against the provision for nomination of any member to the Market Committee.

#### *Conduct of election.*

25. (1) In any ward all registered candidates shall be declared to be duly elected if their number is not more than the number of vacancies.

(2) In such cases, the declaration shall be made by the Chairman in writing, against the name of the candidate concerned, in the final list of candidates published under rule 24.

(3) If the number of registered candidates is greater than the number of vacancies, a poll shall be held.

26. (1) Before the date of publication of the final list of candidates under rule 24, the Commissioners at a meeting shall fix the place or places (hereinafter referred to as polling centres) at which the poll shall be held on the election day and the hours between which voters shall be admitted into the polling enclosures:

Provided that if they fail to do so, the Chairman shall fix such hours and such polling centres.

(2) The poll shall be held at the time and at the polling centres so fixed:

Provided that where it is considered necessary, separate polling centres may be fixed for the recording of votes by female voters.

(3) Notice of such time and such polling centres shall be given by beat of drum and by the publication of notices at the municipal office at the same time as the publication of the final list of candidates under rule 24.

27. After the hours mentioned in the notice referred to in rule 26, no person shall be admitted within the polling enclosure, but the votes of all duly registered voters who are already within the enclosures shall be recorded.

28. Each voter shall be entitled to vote for the ward in respect of which his name has been registered, and for no other, and to give as many votes as there are vacancies for each ward for which he is thus entitled to vote:

Provided that he shall not give more than one vote on the same voting paper to any one candidate.

29. (1) There shall be in each ward at least one polling centre.

(2) Where there are more than one polling centre in a ward the Commissioners shall cause a notice to be published showing the names and serial numbers as given in the Final Electoral Roll of persons whose votes will be recorded at any specified polling centre in the ward.

(3) The Chairman may, if he thinks necessary, provide more than one polling booth in a polling centre and shall cause a notice to be published at the gate of each polling booth showing the serial numbers, as given in the Final Electoral Roll, of persons whose votes will be recorded at the booth.

(4) The Commissioners at a meeting shall appoint a polling officer who is neither himself a candidate for election nor the agent of a candidate to preside over the election at each polling centre, and where there are several polling centres in one ward shall declare one of the polling officers to be the chief polling officer.

(5) If a polling officer for any reason fail to attend, the Chairman shall appoint another fit and proper person, who is not himself a candidate or the agent of a candidate, to take his place.

(6) To assist the polling officer, there shall be appointed by the Commissioners at a meeting an Election Committee consisting of not more than five ratepayers of the ward who are not themselves candidates or agents of candidates. No election shall be void because any or all of the members of the Committee fail to attend: if less than three members attend, the polling officer may appoint other ratepayers not being themselves candidates or agents of a candidate up to the number of three and the persons thus appointed shall then be deemed to be members of the Election Committee.

30. (1) On the morning of the election day the Chairman shall supply the polling officer with the following:—

(a) a ballot box provided with an aperture for receipt of voting papers;

(b) an instrument for stamping the official mark on such papers;

(c) a copy of the Final Electoral Roll, with the particulars prescribed in rule 29 (2);

(d) a bound book or books containing as many voting papers serially numbered in foil and counterfoil as there are voters entered in the Final Electoral Roll for that polling centre, and other person entitled under rule 37 (1) to vote at that polling centre.

(2) The Chairman shall cause to be provided at each polling centre sufficient writing materials with which voters may mark the voting papers.

(3) The official mark shall be kept secret until the commencement of the polling.

31. The voting paper shall be printed in English or both in English and Bengali in Form D annexed to these rules. The names of candidates in English shall be in alphabetical order. When the voting paper is printed in both the languages the name shall be printed in Bengali below that in English in each case.

32. With the object of safeguarding the secrecy of the ballot and of preventing undue crowding, the Chairman shall divide each polling booth into two rooms or compartments, hereinafter called the inner and outer compartments. Votes shall be recorded in the inner compartment.

33. (1) On the election day the polling officer shall admit to the outer compartment of the polling booth the candidate and such agents as may be selected by the candidates to assist in the identification of voters, provided that there shall be present at one time, in addition to the candidates, not more than one agent of each candidate.

(2) Only voters, members of the Election Committee and such other persons (if any) as the polling officer may by special directions admit shall be allowed to enter the inner compartment of the polling booth.

(3) No candidate or agent of a candidate shall be admitted into the inner compartment except for recording his own vote.

(4) The polling officer shall regulate the number of voters to be admitted at any one time into either the inner or the outer compartment.

34. Immediately before the commencement of the poll the polling officer shall satisfy such persons as may be present in the outer compartment that each ballot box is empty and shall then lock it and place upon it his seal in such manner as to prevent its being opened without breaking such seal.

35. The candidates and their agents shall not speak to or address any intending voter in the polling booth, but may submit to the polling officer objections to a voter on any of the following four grounds:-

(1) That his name is not on the Final Electoral Roll of the ward in respect of which the election is being held.

(2) That his claim to be a certain voter shown on the Final Electoral Roll is false.

(3) That he has already voted.

(4) Where there is more than one polling centre in a ward, that under rule 28 he is not entitled to record his vote at the polling centre in respect of which the objection is raised.

36. The procedure for recording a vote shall be as follows:—

- (i) There shall be no voting by proxy.
- (ii) As each intending voter enters the outer compartment, his name and his number in the Final Electoral Roll shall be called out, so that everybody present can hear them.
- (iii) No objection to an intending voter shall be entertained except on the grounds mentioned in rule 35.
- (iv) Every objection shall be summarily decided by the polling officer, who may for this purpose take such evidence as may be available on the spot.
- (v) If after taking such evidence the polling officer disallows the objection or if no objection is raised, he shall hand the voter the foil of a voting paper for the ward and shall allow him to proceed to vote.
- (vi) Immediately before a voting paper is delivered to a voter, it shall be marked on the back with the official mark and an indication shall be placed in a copy of the Electoral Roll against the number of the voter to denote that he has received a voting paper, but no note shall be made of the particular voting paper which he has received.
- (vii) The number of the voter in the Final Electoral Roll shall be marked on the counterfoil of his voting paper.
- (viii) A voter who has received a voting paper shall forthwith be directed, by the polling officer or a person (not being a candidate or his agent) deputed by the polling officer for this purpose, to a place set apart therefor in the inner compartment and shall there mark a cross, within the space headed "voter's mark" on the voting paper, against the name of any candidate for whom he intends to vote. He shall then conceal his vote by folding the voting paper and shall put the paper so folded into the ballot box. He shall vote without undue delay and shall quit the polling enclosure as soon as he has put the voting paper into the ballot box.
- (ix) If the voter is unable to read the voting paper or to make a cross thereon, the polling officer shall mark the vote on the voting paper according to the direction of the voter at the place set apart within the inner compartment under clause (viii) of this rule, provided that if the voter so requests he shall do so in the outer compartment. The voter shall then put the voting paper folded as prescribed in clause (viii) into the ballot box.

37. (1) A polling officer or a member of an Election Committee at a polling centre where he is not entitled to vote shall be allowed to record his vote there on his producing a certificate on a ballot paper from the polling officer of another polling centre that he is entitled to vote at such other centre.

(2) Such vote shall be recorded in the manner prescribed in rule 36 except that the voting paper after being filled in and folded as therein prescribed shall be placed, with the certificate, in a sealed envelope by the polling officer and sent to the polling officer of the other polling centre who shall remove it from the envelope and put it in the appropriate ballot box.

38. It shall be the duty of the polling officer and the Election Committee to see that votes are recorded with the utmost secrecy, that the number on the voting paper handed over to a voter is not divulged to any other person, that no persons are admitted to either compartment except under these rules and that persons who have recorded their votes or against whom objections have been allowed are caused to leave immediately. It shall also be their duty to see that these rules and any special directions given by the polling officer thereunder are strictly observed.

39. (1) On the conclusion of the poll, the polling officer shall, with the assistance of the Election Committee, in the presence of the candidates or their agents, if any—

- (a) satisfy himself that the seals affixed to the ballot boxes under rule 34 are intact, and either
- (b) forthwith, when there is only one polling centre in the ward, open the ballot box and scrutinise the votes in accordance with rule 40, or
- (c) when there are several polling centres in the ward send to the chief polling officer the ballot boxes and the books of counterfoils and unused foils of voting papers and the marked copy of the Electoral Roll properly sealed with his own seal and the seal of such candidates or agents as may desire to affix their seal.

(2) The chief polling officer shall thereupon with the assistance of the Election Committee, in the presence of the candidates or their agents, if any, satisfy himself that the seals are intact, open the ballot boxes and scrutinise the votes in accordance with rule 40.

40. Any voting paper not marked, marked otherwise than with a cross, or marked elsewhere than in the space provided for the purpose, or on which more crosses are marked than there are vacancies, or on which a cross is so placed as to make it doubtful to which candidate the vote has been given, or on which any mark is made by which the voter may be identified shall be invalid. A note to this effect shall be made upon it by the polling officer and it shall not be included in the count.

41. When the voting papers have been scrutinised the polling officer or the chief polling officer shall with the assistance of the Election Committee, in the presence of the candidates or their agents, if any, count the valid votes and declare to be elected in any ward the candidate or candidates to whom the highest number of votes has been given. If there be an equality of votes and if the number of vacancies does not admit of all the candidates who have obtained an equality of votes being elected, he shall by drawing lots in such manner as he may determine select one of such candidates whom he shall declare to be elected.

42. The polling officer or the chief polling officer shall forthwith, if not himself the Chairman, report in writing the result of the election to the Chairman.

43. When a candidate has been elected for more than one ward—

- (a) he shall be declared by the Chairman to have been elected for such ward, if any, out of those wards in which the election has been uncontested,

- (b) otherwise, within five days from the date of the election, he shall declare which of such wards he will represent, and if he fails to make such declaration, the Chairman shall forthwith declare the ward which such candidate shall represent.

In either case such candidate shall be held to be elected in the ward in respect of which a valid declaration has been made under this rule, and in every other ward for which the said candidate has been elected the result of the election shall be determined as if no votes had been recorded for him:

Provided that, if there is no other candidate for whom votes have been recorded to fill the vacancy thus caused, a fresh election shall be held.

44. A second election, under section 26 of the Act, shall begin at the stage from which the original election failed, *e.g.*, if the election failed at the time of polling a fresh poll only shall be held or if the election failed for want of candidates, fresh nominations shall be called for.

45. When the voting papers have been scrutinised and counted the polling officer or the chief polling officer, as the case may be, shall forthwith replace them in the ballot box from which they were taken and seal it in the manner prescribed by rule 34 and rule 39(I)(c). He shall also seal up the books of counterfoils and unused foils of voting papers and also the copy of the marked Electoral Roll, with his own seal and the seal of such candidates or their agents as may desire to affix them. If he is not himself the Chairman, he shall make them over with the ballot box to the Chairman to be kept in safe custody until the books and the voting papers are destroyed under rule 46.

46. On the expiry of 30 days from the date of declaration of the result of the election, or, if an election petition has been filed under section 36 of the Act, as soon as possible after the disposal of the petition, the voting papers in the ballot boxes and the sealed books containing unused voting papers and counterfoils shall be destroyed in the presence of such municipal commissioner or officer as the Commissioners at a meeting may appoint for this purpose.

47. The names of duly elected Commissioners for the whole municipality shall be forwarded by the Chairman through the Deputy Commissioner and the Commissioner of the Division to the Provincial Government for publication. These names shall be published in the *Calcutta Gazette* together with the names or official designation of the Commissioners appointed by the Provincial Government.

48. In a municipality where the Deputy Commissioner is the Chairman, the duties assigned to the Chairman in these rules shall be discharged by the Vice-Chairman.

49. If, in any case, such a course appears to the Provincial Government to be necessary, it may direct that the Deputy Commissioner shall perform all or any of the duties assigned by these rules to the Chairman or the Commissioners at a meeting.

50. No person having directly or indirectly by himself or his partner any share or interest in any contract or employment with, by or on behalf of the Commissioners, or holding any office of profit under the Commissioners, shall, directly or indirectly, engage in canvassing for votes or otherwise assist in the election of any candidate otherwise than by giving his own vote.

51. All costs incurred in the preparation, printing and publication of the Electoral Rolls, the publication of notices, the holding of elections, or the taking of any other necessary action under these rules, shall be payable by the Commissioners out of the municipal fund.

**DEPARTMENT OF AGRICULTURE, BENGAL.**

---

**PRELIMINARY FORECAST OF THE JUTE CROP OF BENGAL, 1940.**

[NOTE.—On an average of the five years ending 1937-38, the areas under jute in Bengal and the Bengal States to which this forecast relates, represent some 81·7 and 1·1 per cent. respectively of the total area under jute in India.]

The preliminary forecast deals only with the estimates of area sown and the condition of the crop at the time of publication of the forecast. The estimates of the area are based on information received through the Collectors from the Revenue staff; also from the Presidents, Union Boards, and the Agricultural Officers.

**Area sown in 1940.**—In Bengal including the States returns for the present season show a total area of 3,454,450 acres, an increase of 904,850 acres or about 35·49 per cent. as compared with the figure for 1939.

**Character of the season.**—Rainfall in February was sufficient for preparation of lands in the earlier districts. Good showers in March facilitated the operation and sowing commenced on an extensive scale both in low and midlands. The progress made with sowings was very good and the germination also was satisfactory. This favourable weather condition in the early part of the season combined with the high price of jute, accounts for the large increase in area this year. Drought in April somewhat interfered with the progress of the high land sowings, specially in some West Bengal districts and some damage was done to midland sowings. Fairly widespread rainfall in May, however, facilitated late sowings and benefited the growth of the plants. Occasional showers with alternate sunshine in June were generally very favourable for the development of the crop. Cutting has already commenced in the low and *char* lands. On the whole, almost all the districts have experienced very satisfactory growing conditions this year.

**Present state of the crop.**—The present condition of the crop is generally good.

**Stock.**—There is little stock in the hands of cultivators.

## DEPARTMENT OF AGRICULTURE, BIHAR.

### PRELIMINARY FORECAST OF THE JUTE CROP OF BIHAR, 1940.

[NOTE.—On an average of the five years ending 1937-38, the area under jute in Bihar to which this forecast relates has represented some 19·4 per cent. of the total area under jute in India.]

The present forecast deals only with the estimated area sown. It gives also a general survey of prospects but makes no reference to the probable outturn either in percentage figures or in bales.

2. **Area.**—I estimate the area sown during the current and four preceding years, in round numbers as follows:—

Year.				Acres.
1936	...	...	...	463,600*
1937	...	...	...	445,000
1938	...	...	...	315,500
1939	...	...	...	265,500*
1940	...	...	...	282,200

\*Revised.

3. **Weather conditions.**—In March rain fell in all jute-growing districts, the fall being above the normal everywhere. In April light rain fell in all the jute districts. The fall was below the normal everywhere. In May rain fell in all the jute-growing districts, the fall was moderate in Darbhanga and the Santal Parganas and light in the remaining districts. Rainfall in June was general throughout the jute districts. The weather conditions in the most important jute-growing areas of Purnea were favourable in the beginning. Sowings were normal.

4. **District returns.**—Last year's area under jute has been finally estimated at 265,500 acres. The total area under jute this year is estimated by the District Officers in round numbers at 282,200 acres. The slight increase in area is due to rise in the price of jute and also to early rain.

5. **Condition and prospects.**—The present condition of the crop is good.

6. **General.**—The quantity of jute which remains in the province from the crops of 1939 is reported to be not much.

The statement below compares the estimated area under jute in this province this year with the preliminary and final figures of last year:—

## DEPARTMENT OF DEVELOPMENT, ORISSA.

## PRELIMINARY FORECAST OF THE JUTE CROP OF ORISSA, 1940.

[Note.—On an average of the five years ending 1937-38 the area under jute in Orissa to which this forecast relates, represents about 0.6 per cent. of the total area under jute in India.]

The present forecast deals only with the estimates of area sown and the condition of the crop up to the first week of June. It makes no reference to the probable outturn either in percentage figures or in bales.

**Acreage.**—The total area sown is estimated in round figure at 28,400 acres against 22,500 acres in the last year. Sowing is still in progress in districts Balasore and Puri.

**Character of the season.**—In the three districts of Cuttack, Balasore and Puri, the rainfall in April was below the average but in May there were good falls, the total being much above the average. The rainfall in May stimulated sowing.

**Condition and prospects.**—The present condition of the crop is fair. The stocks in the hands of the cultivators are reported to be very small.

\*The zero of the Buxar gauge has been checked from the G. T. S. Bench mark Nos. 125 and 126 on line 70K and found to be 199.91 feet above the Bengal datum and from 1st January 1931, high water level and low water level readings are shown at Swarupganj.

(A) The value of the zero of the gauge at the station was 5.26 feet from 1st to 17th April 1940 and 5.04 feet from 18th to 30th April 1940.

Hence the average height above zero of the gauge at the station is twice shown thus:—From 1st to 17th April 1940—52.35 feet; and from 18th to 30th April 1940—52.42 feet.

**THE INDIA AND BURMA (EMERGENCY PROVISIONS) ACT, 1940.**

(3 & 4 Geo. 6 Ch. 33.)

**CHAPTER 33.**

**An Act to make emergency provision with regard to the Government of India and Burma.**

[27th June, 1940.]

Be it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1.—(1) Any power of appointment to, or removal from, any office in India (including any power as to appointments to act temporarily in an office) being a power which, apart from the provisions of this section, would be exercisable by His Majesty, shall, during the period specified in section 3 of this Act, be exercisable also by the Governor-General:

Provided that the foregoing provisions of this sub-section shall not apply in relation to the office of Governor-General or the office of His Majesty's Representative for the exercise of the functions of the Crown in its relations with Indian States, but section 90 of the Government of India Act (which, as set out in the Ninth Schedule to the Government of India Act, 1935, provides for the temporary exercise of the powers of the Governor-General in the event of a vacancy in that office) shall apply in relation to any period during which the Governor-General is for any reason unable to perform the duties of his office as it applies in relation to the period mentioned in sub-section (1) of the said section 90.

(2) Any provision which, under the Government of India Act, 1935, could be made (a) by an Order in Council made in accordance with the provisions of sub-section (1) of section 309 of that Act; or (b) by rules made

by or with the sanction of the Secretary of State, may, during the period specified in section 3 of this Act, be made also by the Governor-General by notification in the Gazette of India; and any notification made under this sub-section may be varied or revoked by a subsequent notification made thereunder or in any other manner in which such Order in Council, or, as the case may be, such rules could be varied or revoked.

(3) Section 72 of the Government of India Act (which, as set out in the Ninth Schedule to the Government of India Act, 1935, confers on the Governor-General power to make Ordinances in case of emergency) shall, as respects Ordinances made during the period specified in section 3 of this Act, have effect as if the words: "for the space of not more than six months from its promulgation" were omitted; and notwithstanding the provision in the said section 72 that the power of making Ordinances thereunder is subject to the like restrictions as the power of the Indian Legislature to make laws—(a) Ordinances may, during the said period, be made under that section affecting the Army Act, Air Force Act, or Naval Discipline Act; and (b) section 111 of the Government of India Act, 1935 (which exempts certain British subjects from certain Indian laws) shall not apply to any Ordinance made under the said section 72 during that period.

(4) The functions of the Governor-General under this section shall be deemed for the purposes of the Government of India Act, 1935, to be included among the functions which he is, by or under that Act, required to exercise in his discretion, and so much of section 18A of the Interpretation Act, 1889, as provides that the expression "Governor-General" in relation to the period between the commencement of Part III of the Government of India Act, 1935, and the establishment of the Federation of India, means the Governor-General in Council shall not apply to this section.

2.—(1) Any power of appointment to, or removal from, any office in Burma which, apart from the provisions of this section, would be exercisable by His Majesty, shall, during the period specified in section 3 of this Act, be exercisable also by the Governor:

Provided that this sub-section shall not apply in relation to the office of Governor.

(2) Any provision which, under the Government of Burma Act, 1935, could be made—(a) by an Order in Council made in accordance with the provisions of sub-section (1) of section 157 of that Act; or (b) by rules made by the Secretary of State, may, during the period specified in section 3 of this Act, be made also by the Governor by notification in the official Gazette of Burma; and any notification made under this sub-section may be varied or revoked by a subsequent notification made thereunder, or in any other manner in which such an Order in Council, or, as the case may be, such rules, could be varied or revoked.

(3) Notwithstanding anything in Part IV of the Government of Burma Act, 1935, any Ordinance promulgated under section 42 of that Act during the period specified in section 3 of this Act and any Governor's Act made during that period may affect the Army Act, Air Force Act or the Naval Discipline Act, or any similar law enacted by competent authority in India; and section 44 of the Government of Burma Act, 1935 (which exempts certain British subjects from certain Burmese laws) shall not apply to any Ordinance under the said section 42 or to any Governor's Act promulgated or made during that period.

(4) The functions of the Governor under this section shall be deemed for the purposes of the Government of Burma Act, 1935, to be included among the functions which he is, by or under that Act, required to exercise in his discretion.

(5) The operation of sub-section (1) of section 9 of the Government of Burma Act, 1935 (which relates to the procedure to be followed as to the issue of Instructions by His Majesty) is hereby suspended during the period specified in section 3 of the this Act.

3. The period referred to in the preceding sections is the period beginning with the date of the passing of this Act and ending with such date as His Majesty may by Order in Council declare to be the end of the emergency which was the occasion of the passing of this Act.

4.—(1) Without prejudice to the provisions of section 314 of the Government of India Act, 1935 and section 10 of the Government of Burma Act, 1935 (which provide for the control of the Secretary of State over the discretionary powers of the Governor-General of India and the Governor of Burma) the powers exercisable by virtue of this Act by the Governor-General of India and by the Governor of Burma shall not be exercised except on the direction of the Secretary of State:

Provided that the Governor-General or Governor as the case may be, may exercise any such powers without any such direction if, and only if, it appears to him that it is essential that the powers should be exercised and that a previous reference to the Secretary of State is likely to cause undue delay in the exercise thereof.

(2) The validity of anything done by the Governor-General or Governor shall not be called in question on the ground that it was done otherwise than in accordance with the provisions of this section.

5. This Act may be cited as the India and Burma (Emergency Provisions) Act, 1940.

### Conditions.

1. The Divisional Forest-Officer does not bind himself to accept the highest or any offer for any lot or to give any reason for such non-acceptance.
2. The sale of any lot, the value of which exceeds Rs. 5,000, shall not be complete until confirmed by the Conservator of Forests, Bengal.
3. The purchaser whose offer is accepted by the officer holding the sale must deposit earnest money of 10 per cent. of his offer for each lot and in the event of the sale being confirmed the earnest money will be retained against the security deposit. If two or more lots be taken by the same purchaser, the Divisional Forest Officer may relax this condition in such individual case and to such an extent as he deems fit, subject to the proviso that in any case the minimum earnest money payable is Rs. 500 or 10 per cent. whichever is less. In the event of the sale not being confirmed, the earnest money will be returned.
4. Security deposit of 10 per cent. of the purchase-price will be demanded within 10 days of the sale if paid in cash. If paid in any other form permissible under Government rules the deposit must be 15 per cent. of the purchase-price. In the event of the security deposit being less than the amount paid as earnest money, the difference between the security and earnest money will be credited towards the first instalment.
5. Failure to complete the payment of security deposit by the prescribed date will render the purchaser liable to the forfeiture of his earnest money and failure to execute the agreement within one month of receiving the same will render the purchaser liable to the forfeiture of the security deposit.
6. The lot or lots so affected shall be resold by public auction or tender at the discretion of the Divisional Forest Officer, and the purchaser shall be liable for any loss to Government on such resale.
7. Purchasers will be required to execute agreements in the printed form for outright sales (copies of which may be seen in the Divisional Forest Offices, Jalpaiguri, Buxa, Kurseong, Kalimpong and Darjeeling).
8. The following are among the conditions for "Clear Felling" lots :—
  - (a) Felling and extraction to be completed by 31st March 1941 and on no grounds can an extension be given after that date.
  - (b) The purchase-price to be paid in three approximately equal instalments on or before—
 

1st Instalment	..	..	..	..	..	..	1st	October	1940.
2nd	..	..	..	..	..	..	1st	January	1941.
3rd	..	..	..	..	..	..	1st	March	1941.
9. The following are among the conditions of the agreements for "Dry" and all other lots :—
  - (a) Felling and extraction to be completed by 31st December 1941.
  - (b) The purchase-price to be paid in five approximately equal instalments on or before—
 

1st Instalment	..	..	..	..	..	..	1st	October	1940.
2nd	..	..	..	..	..	..	1st	January	1941.
3rd	..	..	..	..	..	..	1st	April	1941.
4th	..	..	..	..	..	..	1st	August	1941.
5th	..	..	..	..	..	..	1st	November	1941.
10. All marked trees must be felled and all green sal trees must be barked.
11. In felling marked trees every reasonable precaution, such as lopping off branches, use of ropes and wedges, etc., must be taken to prevent damage to unmarked trees.
12. No timber shall be sawn in the forest unless salemarked before sawing, except in Clear Felling Coupes.
13. Advance sale marked may be given up to 80 per cent. of the value of passed logs and sawn timber in cases where delay in final payment is anticipated.
14. No timber may be removed from any coupe unless paid for in full and duly salemarked. Purchasers are allowed to remove only timber, duly salemarked and not any other forest produce. Issue of private permits by purchasers for fire-wood, etc., is strictly forbidden.
15. Species, measurements and numbers of trees are not guaranteed. But claims for shortage of trees or any discrepancy in species or measurements will be considered up to one month from date of confirmation of sale.
16. Under no circumstances will the security deposit be credited towards the last instalment.
17. The security will be released only after completion of stump checking and after all dues are fully settled.
18. Purchasers of the lots shown in the annexed Schedule must supply the Forest Department the number or quantity of passed logs or sawn timber or both, as the case may be, at the current prices and within the prescribed dates as detailed in the Schedule. These timbers will be first charged on the outturn of the respective lots. In the event of the failure of the purchaser to supply the whole or any part of the total quantity of sal logs or sawn timber or both as aforesaid on the dates mentioned in the Schedule it shall be lawful for the Divisional Forest Officer to secure the whole or the deficit quantity of sal logs and/or sawn timber from other sources and any loss incurred by the Divisional Forest Officer in so doing shall be recoverable from the purchaser.

Should any further orders, in addition to those shown in the annexed Schedule, be allotted to coupes, contractors will be notified before the auction.

Jalpaiguri, the 11th July 1940.

The conditions of sale approved.

T. M. COFFEY,  
Divisional Forest Officer, Jalpaiguri Division.

W. MEIKLEJOHN,  
Senior Conservator of Forests, Bengal.

Note.—Since the 1st January 1929 the datum of all gauges has been finally altered to refer to the Bengal Public Works Department datum which is 8·35 feet reduced levels recorded since each gauge was established have been prepared.

\*The zero of the Buxar gauge has been checked from the G. T. S. Bench marks Nos. 125 and 126 on line 70K and found to be 169·91 feet above the Bengal datum and from 1st January 1931, high water level and low water level readings are shown at Swarupganj.

(A) The value of the zero of the gauge at the station was 5·04 feet from 1st to 25th May 1940 and 8·04 feet from 26th to 31st May 1940. Hence the average height (B) The value of the zero of the gauge at the station was 31·45 feet from 1st to 6th May 1940 and 28·45 from 7th to 31st May 1940. Hence the average height

**Resolution on the Report of the Director of Public Health, Bengal, for  
the year 1938.**

**GOVERNMENT OF BENGAL.**

**Department of Public Health and Local Self-Government.**

**CALCUTTA, THE 23rd JULY 1940.**

**RESOLUTION—No. 1176P.H.**

**Read—**

The Report of the Director of Public Health, Bengal, for the year 1938.

The outstanding incident during the year under review was the unusually serious flood which affected to a varying extent no less than 14 districts in the province. As an aftermath of the flood there was a severe epidemic of cholera. The Public Health Department, besides taking other necessary measures and rendering adequate assistance to the local authorities, took prompt action by deputing numerous anti-epidemic units which combined curative and preventive work. These units proved effective in preventing the epidemic of cholera, serious as it was, from assuming a more disastrous magnitude.

**Vital Statistics.**—There were 1,521,254 births registered in the year under review as against 1,707,050—a fall of 185,796. The birth rate was 30.48 per mille being 10.8 per cent. below the 1937 rate. 1,315,886 deaths were registered in 1938 as compared with 1,232,971 in the preceding year—an increase of 82,915, the death rate being 6.9 per cent. above that of the preceding year. Against the quinquennial average of 31.9, the birth rate in the year under review showed a decline of 4.4 per cent. and the death rate showed a rise of 10.4 per cent. as compared with the average of 23.9. The Director of Public Health has drawn attention to the simultaneous deterioration in respect of both births and deaths as a remarkably rare incident in the health record of the province, the last occasion on which a similar event occurred being 1918, the year of the influenza epidemic. The total number of births exceeded the total number of deaths by 205,368 as against an excess of 474,079 in the previous year. Pabna and Calcutta were the two districts in which deaths exceeded births.

The birth rate in Bengal was lower than in all other provinces, except Assam and Sind. The mortality rate was also higher than in all other provinces, with the exception of Bombay, the Punjab, the Central Provinces and Orissa. The highest birth rate was recorded in the districts of Darjeeling (38.3) and Murshidabad (37.6) while Khulna recorded the lowest birth rate (24.1). The highest death rate was recorded in the district of Darjeeling and the lowest in Khulna. The proportion of male births in every 100 female births was 107 against 108 in 1937.

The system of recording vital statistics in this province is not a completely satisfactory one and the margin of inaccuracy which undoubtedly exists cannot be gauged. This limitation should be borne in mind in regard to any statistical review based on the available figures.

**Infantile and maternal mortality.**—The aggregate number of infantile deaths in 1938 was 280,923 against 300,770 in 1937. The infant mortality rate per thousand births rose to 184·7 from 176·2 in 1937. 55 per cent. of the total deaths were recorded among infants under one month, 29 per cent. among those between one and six months and 16 per cent. among infants between 6 and 12 months of age. The rate of child mortality in Bengal was higher than in any other province, except the Central Provinces, Orissa and Burma. The number of still births has also been steadily on the increase from year to year. In the year under review the rate stood at 4·7 for every hundred live births; in other words, out of every 22 births one was a still birth. The deaths recorded from maternal causes numbered 17,438. Apart from the possibly large margin of inaccuracy in recording this class of deaths, there must have been many deaths associated with, but not ascribed to, child birth for which there is no provision for registration. The usual annual grants to local bodies for training of indigenous *dais* were made by Government. Provision was also made for training of pupil nurses and *dais* in State and private hospitals. Suitable recurring contributions were also given to maternal and child welfare centres and for holding health welfare weeks. The Red Cross Society continued to do excellent work in this connection. The maternity and child welfare services fall primarily within the responsibility of the local authorities, but this work has not received in the past the attention that it deserves. Since the close of the year under review, Government have adopted a scheme for making liberal grants-in-aid towards establishment and maintenance of welfare centres and clinics throughout the province. Improvement of nursing is also receiving attention.

**General epidemiology—Cholera.**—There were 71,133 deaths from cholera in the year under review against 32,710 in the preceding year, showing an increase of 100 per cent. The death rate 1·4 was 40 per cent. more than the average of the preceding quinquennium. Cholera accounted for 5·4 per cent of the total provincial deaths in the year under review. The marked decrease in the incidence of cholera in 1937 appears to indicate a turning point in control as a result of extensive anti-cholera measures. The severe flood in 1938, an unforeseen event, inevitably worsened the position although adequate and organised measures were effective in controlling the epidemic as far as possible.

The highest death rate, viz., 4·9, was recorded in Palna. Mymensingh and Dacca come next with a rate of 2·5 and Howrah, Faridpur and Tippera with 2·2. Bakarganj, which topped the list of death rate in previous years, returned a death rate of 2·1. The district of Darjeeling continued, as usual, to be free from cholera. There were 67,771 deaths in the rural areas with a rate of 1·5 per mille, against 7 in 1937. The towns recorded 3,362 deaths with a rate of 1·0 against 5 in the preceding year. The incidence of mortality from this disease was higher than in any other province except the Central Provinces, Assam and the United Provinces.

**Cholera-preventive measures.**—All approved anti-cholera measures were adopted in combating this disease. The quantity of cholera vaccine issued and the number of inoculations showed, for obvious reasons, a large increase. Other preventive measures included disinfection of sources of water-supply and of infected dwellings, provision of facilities for inoculation of pilgrims, extensive public health propaganda through the district health units and the divisional publicity staff now in charge of the Director of Public Information, as well as promulgation of temporary regulations under the Epidemic Diseases Act in affected areas. During the year under review the Public Health Department adopted a new method of combating cholera epidemics by organising a large number of medical and sanitary units combining preventive and curative work, each unit consisting of a medical licentiate, a compounder, a medicine carrier and a Sanitary Inspector. The work of these units met with enthusiastic appreciation from the public. Assistance was also rendered to the local authorities by lending services of medical officers and sanitary inspectors as soon as calls for help were received. The prompt and organised action initiated by the Public Health Department prevented the local cholera epidemics caused by the floods from assuming the magnitude of a provincial calamity.

**Small-pox.**—Small-pox was responsible for 9,289 deaths against 27,944 in 1937, the death rate in the year under review being of .2 per mille against .6 in 1937. There was thus a decrease of 66.7 per cent. in mortality as compared with the figures of the previous year and of 50 per cent. as compared with the average of the preceding quinquennium. This disease accounted for .7 per cent. of the total provincial mortality in 1938. The death rate from small-pox during the year under review was higher than the death rates in Orissa, N. W. F. Province, Assam, Sind, Bombay and the Punjab but lower than those in the other provinces.

Of the total number of deaths from small-pox, 530 occurred among infants below one year of age and 1,183 among children between ages of 1 to 10 years, against 2,414 and 7,452 respectively in 1937. 5.7 per cent. of the total mortality occurred among infants and 12.7 per cent. among children against 8.6 per cent. and 26.7 per cent. respectively in 1937.

Calcutta accounted for 2,193 out of the total deaths from small-pox numbering 2,654, in the towns. Its death rate (1.92) exceeded that of the previous year (.35) by no less than 448.6 per cent. and that of the previous decade by 41.1 per cent. Outside Calcutta, the district of Chittagong returned the highest death rate (.41) while Jalpaiguri, with the same rate as in previous year (.002), was the least affected. In the urban areas, however, mortality from this disease showed an increase of no less than 75 per cent. while the death rate in the rural areas declined by 83.3 per cent.

The number of persons vaccinated during the year under report was 7,843,545 against 8,596,618 in 1937. The decrease was due to the decreased incidence of small-pox and to the continued public apathy to vaccination except in times of actual epidemics.

In a country and a province where the provision for compulsory isolation is outside the range of practical consideration and where the sanitary consciousness and responsibility of the individual is not developed among the mass of the people, vaccination is the only effective preventive against outbreaks. Although primary vaccination is compulsory throughout the province it is well-known that a large number of children escape primary vaccination and consequently remain unprotected. The responsibility for effectively enforcing primary vaccination lies with the local authorities. Government would again impress upon the local authorities the urgent necessity of organising an intensive campaign of vaccination according to a fixed programme spread over a limited number of years so as to cover effectively the population of the whole district.

The total cost of vaccination in 1938 was Rs. 4,58,503 against Rs. 4,87,387 in the previous year. The average cost of each successful vaccination in the whole presidency was one anna and ten pies, i.e.,  $1\frac{1}{2}$  pies more than that of the previous year. The average cost of manufacture of vaccine lymph per dose of half a grain which amounted to 0.6 pie only against .5 of the previous year, compares very favourably with the cost of manufacture in other provinces in India.

**Fevers—Malaria and Kala-azar.**—Fevers took a heavier toll of lives in 1938 than in the previous year. The number of deaths recorded under "Fevers" was 819,763 against 775,586 in 1937. The death rate was 16.4 per mille against 15.5 per mille in the previous year, an increase of 8.6 per cent. on the last quinquennial average. The progressive rise in fever mortality from year to year, due mainly to the scourge of malaria, is the outstanding public health problem of this province.

**Malaria.**—There were 416,521 deaths registered during the year, representing an increase of 43,529 over the figures of the previous year with a death rate of 8.3 as against 7.5 in 1937. It accounted for 50.8 per cent. of the total fever mortality and 31.6 per cent. of the total provincial mortality during the year under report against 48.1 and 30.2 per cent. respectively in the preceding year. Slightly over 98 per cent. of the total fever mortality in 1938 occurred in the rural areas. Rajshahi, topped the list, as in the previous year, with a death rate of 19.0 per mille against 18.8 in 1937. Nadia, with 17.7 against 15.5 per mille in 1937, came next while Calcutta, with 0.7 per mille, recorded the lowest rate. Fever indices, however, indicated that the district of Burdwan had the largest incidence. Compared with the preceding year, there was larger incidence of malaria in 19 districts.

**Kala-azar.**—The incidence of kala-azar has been slowly but steadily on the increase. There were 21,642 deaths from this disease representing a death rate of .43 as against .42 respectively in 1937. The number of deaths in the rural areas increased by 279 from that of the preceding year. As in 1937, the Kurseong town registered the highest death rate of 5.0 per mille. There was a noticeable decline in the total kala-azar cases recorded for treatment in hospitals in the districts of Burdwan, Midnapore Rajshahi, Jalpaiguri and Darjeeling. The special anti-kala-azar campaign which had been started in the Darjeeling district about the middle of December 1937, was continued

throughout the year under report with 19 treatment centres and 2 undieted shelters operating under 10 medical officers. Particular stress was laid on propaganda work with a view to inducing the illiterate patients in the interior to visit the treatment centres regularly till completely cured. The district board carried out the campaign under the supervision of the Public Health Department and provided accommodation for treatment centres and other facilities.

**Special anti-malaria measures.**—The comprehensive malaria survey which was started in 1937 in typical areas was continued during 1938. A mosquito and malaria survey of the Jessore town and its neighbourhood was carried out during 1938 for the purpose of preparing an anti-malaria scheme on a five-year plan for Jessore and its adjoining rural areas financed jointly by the Indian Research Fund Association and the Provincial Government which has been undertaken after the close of the year under review.

The survey and control measures in connection with the campaign against *anopheles ludlowii* were carried out satisfactorily in the Salt Lake area, Budge Budge and the suburban areas with the co-operation of the Corporation of Calcutta and other local authorities and interests concerned.

**Respiratory diseases.**—The number of deaths attributed to respiratory diseases of all forms was 99,763 in 1938 as against 96,986 in the preceding year, representing 2.00 per mille against 1.94. All the districts of Bengal returned increased rates in comparison with the previous decade. As usual, Calcutta recorded the highest death rate (9.2) followed by Jalpaiguri (5.3), Hooghly (4.5), Darjeeling (4.4) and Howrah (4.0). Mulda continued to record the lowest death rate (.4 per mille).

**Pneumonia.**—There were 52,258 deaths compared to 48,927 in 1937. The decline in the death rate in 1937 was not maintained, and mortality was higher by 7.1 per cent. than in the preceding year. As usual, Jalpaiguri recorded the highest rate (4.1) followed by Hooghly (3.1) and Darjeeling (2.3). Mulda recorded the lowest rate (.17).

**Pulmonary tuberculosis.**—The total number of deaths was the same (14,668) as in the previous year with the same death rate (.29 per mille)—an unusual coincidence. The highest death rate (4.1) was reported from South Dum Dum, followed by Darjeeling (3.3). Kurseong which, registered a rate of 3.0 in 1937, recorded no deaths from this disease during the year under report. *Prima facie*, this would appear to indicate a serious inaccuracy in reporting and the matter is being investigated. The Bengal Tuberculosis Association carried on valuable propaganda work in the province with the usual grant from Government. This Association trained a number of tuberculosis workers and home visitors during the year.

**Other diseases.**—Influenza accounted for 2,143 deaths against 2,422 in the preceding year. Cerebrospinal fever took a toll of 1,337 lives in 1938 against 938 in the preceding year. The increase occurred wholly in the rural areas, the death rate from this disease having risen by nearly 100 per cent. The ravages of this fever have been on the increase from year to year. In 1937, the mortality from typhus fever was about double the number of the previous year; in 1938, again

deaths from this disease numbered nearly twice those of 1937. In the rural areas alone, the death rate rose by 33·3 per cent. above that of the previous year. There was an all-round increase in the death rate from *enteric fever* in 1938, the rate being 20 per mille against 18 in 1937 for the whole province. Dysentery and diarrhoea were responsible for a toll of 37,966 and 31,266 deaths respectively, representing an aggregate death rate of 1·4 per mille against 1·1 per mille in the previous year, and 5·3 per cent. of the total provincial mortality against 4·6 in 1937.

**Leprosy.**—The number of recorded deaths from leprosy was 1,316 against 934 in the preceding year. The incidence of this disease was higher in 12 districts of the province than in the other districts.

**Fairs and festivals.**—The Director of Public Health has given an interesting account of the medical and sanitary arrangements made by the local authorities concerned, in co-operation with and under the guidance of the Public Health Department, for the welfare of the pilgrims and the prevention of outbreaks of infectious diseases in the Ganga Sagar and Nagaland melas which were attended by a larger number of pilgrims than in the previous year. The anti-cholera work carried out by the St. John Ambulance Association at the embarkation ground at Ganga Sagar Mela was highly appreciated by the pilgrims. There was only one death from dysentery at Ganga Sagar and only one case of cholera on the way to Diamond Harbour which proved fatal. At the Nagaland mela ground there were two deaths from cholera, one from dysentery and one from heart failure.

**Sanitation and water-supply.**—Rs. 54,09,142 or 37·5 per cent. of the total receipts inclusive of the opening balance was spent by municipal bodies in Bengal on sanitary works during the financial year 1937-38, showing a decrease of 1·9 per cent. compared with the expenditure of the previous financial year. The average expenditure per head of the municipal population rose from Rs. 2-1-8 in 1936-37 to Rs. 2-4-9 in 1937-38. The total municipal expenditure on sanitation in the year under review included Rs. 24,84,783 on conservancy, Rs. 14,65,984 on water-supply and Rs. 4,48,294 on drainage. The proportion of total expenditure of the district boards on water-supply to their total receipts was the same as in the previous year, viz., 3·8 per cent. whereas the proportion with regard to sanitation indicated an upward trend, being 8·5 per cent. against 7·9 in the preceding year.

The union boards spent Rs. 52,21,210 in carrying out the various works of public utility contemplated by the Village Self-Government Act. A total sum of Rs. 9,94,567 was devoted to water-supply, Rs. 96,708 to drainage and Rs. 83,816 to conservancy.

During the year under review, Government made substantially increased grants towards water-supply for drinking purposes in the rural areas. A revised policy for the improvement of water-supply in the rural areas of the province was introduced during the year under report. Under this policy local water-supply committees at the

headquarters of districts subdivisions and thannas were set up for drawing up a programme of works according to the real needs of particular areas and localities. It was also laid down that exemptions in respect of local contribution should be granted very liberally, so that the poorer areas may participate in the programme.

**School Hygiene.**—The school health services which are in existence in Calcutta and the municipal and rural areas are far from adequate and the matter has been receiving the attention of Government. During the year under review a scheme for medical inspection in all high schools in the province was approved by Government in the Education Department. Since the close of the year, Government have approved the proposal of reviving the School Hygiene Division under the Public Health Department for the systematic inspection of schools and the medical inspection of school children.

**Health propaganda.**—Health publicity work was carried out throughout the province on the usual lines by the publicity staff, with a view to improving the health consciousness of the people. Ten touring parties worked throughout the province while 2 were stationed in Calcutta. A new film on the interesting subject of "Woman's Role in National Health" was prepared during the year. The Government exhibition van gave 99 demonstrations in the various districts and the work was greatly appreciated by the public.

**Miscellaneous.**—While the usual activities of the Public Health Department were maintained at a normal level, during the year under review, certain small advances were made in a few directions and further advances were under the anxious consideration of Government. Grants-in-aid on the usual scale were made to local bodies and voluntary associations in order to enable them to make provision for health welfare services. Besides making the usual contributions towards the salaries of the health officers employed by the local bodies, Government incurred an expenditure of Rs. 11,79,500 in assisting the district boards to maintain the thana public health units in the rural areas. An increased grant of Rs. 7½ lakhs from provincial revenues and of Rs. 3,41,000 from the Government of India's second subvention for rural uplift was distributed among the districts in the Province for the improvement of the sources of water-supply for drinking purposes in the rural areas. An allotment of Rs. 57,500 was also made out of the Central Government's grant for schemes for the improvement of rural sanitation such as, jungle cutting, *doba* filling, drainage, etc. Other subsidies to local bodies included Rs. 80,000 for combating kala-azar, Rs. 50,000 for free vaccination, Rs. 59,000 for anti-malarial works and an increased grant of Rs. 4,00,000 for the free distribution of quinine. A grant of Rs. 10,000 was made to the Tuberculosis Association and the Bengal Branch of British Empire Leprosy Relief Association received a subsidy of Rs. 10,000 for anti-leprosy propaganda work. The prompt and organised action taken by the Public Health Department in combating the epidemics which followed in the wake of the floods has been mentioned elsewhere in the report.

**General Remarks.**—The year 1938 was not a good year for public health. The general death rate increased, while the birth rate fell. The death rate of infants as well as the maternal mortality rate continued to be obstinately high. During the year under review Government took up the consideration of the improvement of the services which aimed at creating healthy environments and of those directed to the prevention and cure of epidemic diseases and the protection of mothers and children as well as of the solution of the problem of water-supply in the rural areas for drinking purposes within as short a time as possible by a comprehensive programme. A scheme was framed for reorganisation of the basic rural health services. Schemes were also prepared for solution of the problem of child and maternal mortality and morbidity and for control of the chief diseases, such as malaria, tuberculosis and leprosy. The Minister of Health has, on more than one occasion, made full statements of the programme which he has set before him in improving the health of the people. The Minister trusts that the local bodies, foreign associations as well as the public in general will render unstinted support and co-operation so that the various problems may be effectively solved without delay.

**Personal.**—Lt.-Col. Chatterjee, I.M.S., held the office of Director of Public Health throughout the year. Government desire to place on record their special appreciation of the enthusiasm, initiative and organising ability displayed by Col. Chatterjee in administering the department during the year under review.

By order of the Governor,

G. S. DUTT,

No. 92-H.—His Excellency the Viceroy  
has been pleased to confer the Indian Police  
Medal on the following officers:—

\* \* \*

### Bengal.

26. Babu Haridas Mukharji, Inspector of  
Police, Intelligence Branch.—Babu Haridas  
Mukharji joined the Bengal Police in 1907  
as a Sub-Inspector and after the usual course  
of training was employed in the districts of  
Midnapore and Bankura. He held charge of  
several important police stations and in 1922  
started to officiate as an Inspector.

On the 14th October 1924 he joined the  
Intelligence Branch and has worked with  
great success in that department from that  
date to this. He was confirmed as an Inspec-  
tor in 1926.

He rendered valuable service in important  
political cases. Throughout his 32 years'  
service he has worked hard and is a most  
trustworthy and reliable officer. His superior  
officers have always found his work to be of  
a very high standard.

During his service he has received 17  
money rewards, 8 good service marks and 7  
commendations.

27. Rai Bahadur Jamini Mohan Kar,  
Deputy Superintendent of Police, Howrah.—  
Rai Bahadur J. M. Kar was enlisted in the  
Bengal Police as a Sub-Inspector in the year  
1910. After as little as six years' service he  
began to officiate as an Inspector in conse-  
quence of the good work he had done in the  
district of Malda. He did exceptional work  
in a political murder case in that district and  
in 1918 was given a cash reward in another  
political case. In 1920 he was awarded the  
King's Police Medal. He was confirmed as  
an Inspector in 1926.

He was transferred to Midnapore in 1926  
and did extremely good work there during  
the Civil Disobedience Movement and in the  
District Magistrate murder cases. In 1931  
the title of 'Rai Sahib' was conferred upon  
him and in 1935 he was given the title of  
'Rai Bahadur'. He began to officiate as a  
Deputy Superintendent in April 1931 and  
was confirmed in that rank on the 5th August  
1937. In 1936 Rai Bahadur Jamini Mohan  
Kar was transferred to Rangpur and organis-  
ed a very successful campaign against dacoity  
in that district. In April 1937 he was trans-  
ferred to Howrah district and began to  
organise village Defence Parties. His work  
in this connection has been extremely useful  
as the Village Defence Parties in Howrah

district have achieved better results than similar voluntary organisations elsewhere. He is an officer of marked personality and ability.

28. Joseph Paul, Inspector of Police (Retired).—Mr. J. Paul was recruited to the Bengal Police as a probationary Sergeant in 1914 and was confirmed in that rank in due course. Early in his career he showed that he possessed detective ability and was marked down for early promotion. He began to officiate as an Inspector in 1920 and was confirmed in that rank in 1925. In his capacity as an Inspector he has done extremely useful work in Darjeeling, Chittagong, 24-Parganas and in the Railway Police. In the course of his service he has earned 60 money rewards and many commendations. His long and uniformly excellent service, which has extended over a quarter of a century, deserves special recognition. He retired from service on 15th October 1939.

29. Maulvi Abdul Hamid Ahmad, Inspector of Police (Retired).—Maulvi Abdul Hamid Ahmad joined the Bengal Police as a Sub-Inspector in 1906. He did good work in various police stations in the Rangpur district and in 1917 was transferred to the District Intelligence Branch where his work was reported to be of a high standard.

In 1926 he was transferred to Rajshahi and was placed in charge of one of the heaviest police stations in that district, where his work quickly showed his fitness for promotion and in 1928 he began to officiate as an Inspector. Maulvi Abdul Hamid Ahmad was confirmed in that rank on the 16th January 1931. In 1933, he was given a gold watch for his good work in a political case. In 1936, on receipt of information, he collected a police party and arrested 6 dacoits *flagrante delicto*. These are but two instances of the zeal and devotion to duty which he has displayed throughout his long years of service from which he retired on 1st July 1939.

30. Maulvi Muhammad Azizur Rahman II, Inspector of Police, Pabna district.—Maulvi Muhammad Azizur Rahman joined the Police Department as a probationary Sub-Inspector in 1913 and after the usual course of training, was confirmed as a Sub-Inspector. In 1918 he was transferred to the Police Training College as a law instructor where he was particularly successful and worked in that capacity until the middle of 1930 when he was promoted and transferred to Dinajpur. He was confirmed as an Inspector in 1932. Maulvi Muhammad Azizur Rahman did very good work in Dinajpur during the Civil Disobedience Movement, and more recently brought under control a serious outbreak of crime which had broken out in the Tapan Circle of Dinajpur district.

In October 1938 the Santhals in Kumarganj police station in Dinajpur district assembled with the intention of attacking the house of a Muhammadan villager. Maulvi Muhammad Azizur Rahman received information that a breach of the peace was anticipated and proceeded to the spot with a small body of police. He tried to induce the Santhals to disperse but this they refused to do and the constables

were ordered to open fire. The action of the Inspector undoubtedly prevented the Santhals from carrying out their declared intention of attacking the house of the villager.

31. Babu Markanday Misra, Officiating Deputy Superintendent of Police, Darjeeling.—Babu M. Misra joined the Police as a Sub-Inspector in 1909 and after only 9 years' service officiated as Inspector, to which rank he was permanently promoted in 1928. He was promoted to act as Deputy Superintendent of Police in 1935 and continues to hold this rank in the District of Darjeeling where his knowledge of the languages and customs of the various peoples inhabiting that district has been of great value. Throughout his 30 years' service his work has been of an exceptionally high standard and successive Superintendents of Police have recorded their keen appreciation of the loyal help he has rendered them. His record is exemplary and he commands the respect of all communities in the district. He is an officer of outstanding merit.

32. Babu Surendra Chandra Lodh, Inspector of Police, Intelligence Branch, Bengal.—Babu Surendra Chandra Lodh distinguished himself as an investigating officer in important political cases and was responsible for the arrest of several important absconders. His work throughout his career is proof of his outstanding ability and unflagging devotion to duty.

33. Babu Dol Gobinda Mukharji, Inspector of Police, Howrah.—Babu Dol Gobinda Mukharji, joined the Bengal Police as a Probationary Sub-Inspector in 1918 and after completing his training was posted to the Rajshahi district. He did good work there during the Non-co-operation Movement and later became a Court Sub-Inspector, in which capacity he was transferred to the Burdwan Range. He was employed in several districts in that range and in 1931 began to officiate as an Inspector in Birbhum. He did very good work in that district and was promoted to the rank of Inspector in February 1936, after which he was transferred to Howrah.

In the Howrah district his work has been of a very high order and he has done much to eliminate corruption from the subordinate ranks of the police force in Howrah Town.

In the course of his service he has received money rewards and his name has appeared in the Administration Report on nine occasions.

34. Babu Bani Kantha Bhattacharji, Inspector of Police, C. I. D., Bengal.—Babu Bani Kantha Bhattacharji joined the Police Department as a probationary Sub-Inspector in 1916 and after a course of training was posted to the district of Khulna. After only two years in that district he was transferred to the Criminal Investigation Department where he is still serving.

As a Sub-Inspector in the Criminal Investigation Department he investigated cases in Dacca, Tippera, Rangpur and Midnapore in a very able manner. He was promoted to officiate as Inspector in 1932 and in 1934 began to work as an assistant to the Handwriting Expert. Two years later he qualified as an Expert.

His work in the Handwriting Department has shown that he is a most capable officer and one whose reasoned opinions are of considerable value to courts. He is a thoroughly honest, trustworthy and loyal officer who can always be relied on to do his best.

35. Babu Annada Prasanna Ghosh, Inspector of Police, Dinajpur.—Babu Annada Prasanna Ghosh joined the Bengal Police as a probationary Sub-Inspector in 1915 and in due course was posted to Tippera district. He was later transferred to Rangpur and in 1928, while he was Officer-in-charge of Saidpur Police Station he handled a serious disturbance in the Karwal Nat Settlement in an admirable manner. On receipt of news of the outbreak he commandeered motor vehicles and succeeded in arresting 200 of the Nats who had broken bounds. He displayed considerable courage in effecting these arrests as the settlers were only brought back to the colony with considerable difficulty.

In 1930 he began to officiate as an Inspector and did excellent work in Rajshahi during the Civil Disobedience Movement. He was later transferred to Dinajpur and was successful in bringing under control a serious outbreak of dacoity. He was confirmed as an Inspector in 1936 and throughout his 24 years' service has displayed great keenness and ability of a very high order.

36. Babu Makhan Chandra Sarkar, Sub-Inspector of Police, Faridpur.—Babu Makhan Chandra Sarkar was enlisted in the Bengal Police in 1917 and for the past 7 years has been employed on political work in Faridpur. His services have been of considerable use to Government in combating the terrorist movement in Faridpur district.

37. Babu Shuchindia Chandra Mukharji, Inspector of Police, Rangpur.—Babu Shuchindia Chandra Mukharji was enlisted in the Bengal Police as a probationary Sub-Inspector in 1913 and after the usual course of training, was posted in the Rangpur district. He did excellent work in the investigation of dacoity cases and in 1928 began to officiate as an Inspector. While in charge of the Nilphamari Circle his abilities were described in glowing terms by the Superintendent of Police. He did good work in gang cases in 1934 and 1935 and was confirmed as an Inspector on the 1st April 1938.

His work, which has extended over a quarter of a century, has been of considerable value to the Administration.

38. Babu Arunoday Chakrabatti, Officiating Deputy Superintendent of Police, Barisal.—Babu Arunoday Chakrabatti was enlisted in the Bengal Police as a probationary Sub-Inspector in 1918 and after training was posted to the Jalpaiguri district. From the start of his career his abilities attracted attention and he was given charge of heavy police stations. He was trained at the Detective Training School in 1926 and in 1928 he began to officiate as an Inspector. He took great pains to train the investigating officers serving under him and attempted to improve their methods of detection. He was confirmed as an Inspector in August 1931, and is now an officiating Deputy Superintendent.

He did very good work in 1930 and 1931 and in 1936 was transferred to Pabna to deal with an outbreak of dacoity in the Serajganj Subdivision. His efforts were successful and the Superintendent of Police has stated that while Babu Arunoday Chakrabatti was in charge of the Serajganj Subdivision, the need for an Assistant Superintendent of Police was not felt.

39. Babu Bhupendra Nath Banarji, Inspector of Police, Intelligence Branch, Bengal.—Babu Bhupendra Nath Banarji has distinguished himself as an investigating officer of great merit and did excellent work in Midnapore district.

40. Babu Praphulla Kumar Datta, Inspector of Police, C. I. D., Bengal.—Babu Praphulla Kumar Datta joined the Bengal Police as a probationary Sub-Inspector in 1919 and after the usual course of training was posted to the Rangpur district. Early in his career he was posted to the Kotwali police station as Officer-in-charge and rendered valuable services.

He was sent to the Detective Training School for a course of training in 1927 and won first prize in medical jurisprudence and 2nd prize in criminal law. He began to officiate as an Inspector in 1928 and was confirmed in that rank in August 1930. Babu Praphulla Kumar Datta was commended for his work; and in 1932 the Range Deputy Inspector-General of Police expressed the opinion that he was one of the best officers in the Rajshahi Range. He was transferred to the Criminal Investigation Department in 1934 and was warmly recommended for breaking up dacoit gangs in Rangpur, Hooghly and Jessore districts. In 1937 he investigated the Hooghly Co-operative Bank Fraud Case with conspicuous ability.

41. Babu Sukdeb Sarkar, Officiating Deputy Superintendent of Police, Midnapore.—Babu Sukdeb Sarkar joined the Bengal Police as a probationary Sub-Inspector in January 1907. He began to officiate as an Inspector in 1925 and was confirmed in that rank in November 1928. He was an excellent investigating officer and made a first class Circle Inspector.

Babu Sukdeb Sarkar was transferred to the Criminal Investigation Department in 1932 and was in charge of the investigation of many dacoity cases, in which he was most successful. In 1936 he began to officiate as a Deputy Superintendent and is now employed in that capacity in Midnapore district. He is a first class officer with an excellent record of service.

42. Maulvi Basiruddin Sarkar, Inspector of Police, 24-Parganas.—Maulvi Basiruddin Sarkar was enlisted in the Bengal Police as a probationary Sub-Inspector in 1913 and after the usual course of training, was posted to the Nadia district. In 1921, he was given a gold watch for good work and at that time the Superintendent of Police was of opinion that this officer was one of the best thana officers in the district. In 1927 he was given officiating promotion and officiated as Inspector until February 1929 when he was confirmed in that

rank. In 1934 he was transferred to the 24-Parganas district where he has done extremely good work in the Diamond Harbour Circle and brought under control a serious outbreak of dacoity.

In the course of his 26 years' service he has received many cash rewards and a number of favourable comments and commendations have been made in his service record.

43. Maulvi Abu Ahmad Fazlul Haq, Sub-Inspector of Police, Noakhali.—Maulvi Abu Ahmad Fazlul Haq joined the Bengal Police as a constable in January 1921. He began to officiate as an Assistant Sub-Inspector in February 1923 and was confirmed in that rank in November 1928. In 1933 he began to officiate as a Sub-Inspector, became a probationer on the 3rd January 1939, and has since been confirmed in that rank.

On the 9th December 1937, while he was employed as 2nd Officer at Lakshmipur Police Station in Noakhali district, he received information of a projected dacoity at Joguarayanpur, a place about 14 miles away in the jurisdiction of a neighbouring police station. There were only 2 constables available for duty in the police station and with these men and some villagers he left Lakshmipur for Joguarayanpur in two taxis. The party arrived at the spot as the dacoits were decamping and immediately arrested two of them. Seventeen persons were ultimately convicted in this case.

Maulvi Abu Ahmad Fazlul Haq has obtained a number of rewards.

44. Raymond Ferdinand Stidston, Inspector of Police.—Inspector Stidston joined the Calcutta Police Force as a Sergeant on the 30th November 1915 and resigned in 1917 to take up munition work. He rejoined the Force on the 1st June 1922 since when his record has been outstanding. He has been granted 14 money rewards and has been five times commended, and was specially mentioned in the Administration Report of the Calcutta Police on three occasions. He was appointed to officiate as Inspector on the 1st January 1934 in the Tax Branch of the Public Vehicles Department and was confirmed in that rank on the 1st March 1935.

He was the first Inspector appointed to the Tax Branch on the 1st January 1934 and took over a new department to administer the Bengal Motor Vehicles Tax Act. During the five years he has been in charge, his work has been of the highest order and by painstaking care and meticulous attention to details he has built up a most efficient department. His work entails close contact with all branches of the public, necessitating a rigid and often distasteful application of the law, particularly in the application of the penalty clause relating to late payment of tax. In addition, he is required to work long hours and to exercise the closest supervision over his staff in the collection of an average of Rs. 12,00,000 per year.

The value of his work in this respect can be gauged by the paucity of audit objections during the last two audit inspections. It is also to the credit of this officer that in spite of

the unpopular nature of his work and his meticulous attention to the literal administration of the Tax Act, no complaints from members of the public regarding him have been received. Inspector Stidston has also detected a case of fraud by one of his staff and has been singularly successful in directing investigation in the recent drive against the "pirate" taxi menace, i.e., in cases under Rule 44A of the Calcutta and Howrah Motor Vehicles Rules, 1930. He has at all times set a high example to his subordinates and the rest of the Force.

45. Albert Edward Prietoe, Inspector of Police.—Inspector Albert Edward Prietoe joined the Calcutta Police as a Sergeant in September 1920 after seven-and-a-half years' service in the Royal Berkshire Regiment. As he showed marked ability as a Drill and Musketry Instructor, he was posted to the Armed Police as a Sergeant Major, and was promoted to the rank of Inspector in 1935. His record in the Calcutta Police has been exceptionally good throughout. During the Carters' Riots of April 1st, 1930, he displayed tact and bravery and the appreciation of Government was conveyed to him through the Commissioner of Police of his admirable handling of the situation in very trying and dangerous circumstances.

He was more than once commended on the efficiency of his Company and on the high standard of discipline maintained by him. His work in training the Armed Police in Ambulance work and stretcher drill was recognised in January 1938, after the inspection of Colonel Sleeman, when His Imperial Majesty the King, the sovereign Head of the Grand Priory in the British Realm of the Venerable Order of the Hospital of St. John of Jerusalem, conferred upon him the insignia of Serving Brother of the Order of St. John.

He has been in charge of three Companies of the Armed Police since 1935, and his keenness, enthusiasm and efficiency is reflected in every member of the Force under him. He is solely responsible for the recruitment and training of the Police Pipes and Drums.

His Excellency the Viceroy, who inspected one of his Companies and the Band at Belvedere, Calcutta, on January the 4th, 1939, congratulated him on their good performance and smart turnout.

46. George John Adamson, Inspector of Police (River Traffic Police).—Inspector G. J. Adamson, after serving several years in the Army, was recruited as a Sergeant in the Calcutta Police in May 1920. He was confirmed as an Inspector in 1926. He was awarded the King's Police Medal in 1929 and a Bar to it in 1931, both for gallantry. He was also awarded the British Empire Medal. He was mentioned in the Annual Administration Report seven times and his services have always been characterised by resource and devotion to duty and have uniformly been one of ability and merit. In difficult situations he has proved his personal courage and shown leadership for which he was particularly commended. He also received commendations of His Excellency the Governor of Bengal on two different occasions.

47. **Maulvi Muhammad Karim Bux**, Inspector of Police (North Division Port Police).—This officer was recruited as a Sub-Inspector in the Calcutta Police in 1917 and was allowed to officiate as an Inspector in October 1934. He was appointed an Inspector of Police on probation in 1936 and was confirmed in that rank in the same year. During the period of 22 years of service this officer has earned several rewards including one reward of Rs. 150 in connection with a Murder case. He was transferred to the Port Police in 1937, and while here he was found to be extremely honest, conscientious and hardworking. His service record shows that the period he has been in the Police has been characterised by strong devotion to duty and merit.

48. **Maulvi Syed Hassan**, Officiating Inspector of Police, Special Branch.—Maulvi Syed Hassan joined the Calcutta Police as a Constable in 1910, was promoted to the rank of Head Constable in 1917, and Sub-Inspector in March 1920, and since that year he has continued in that rank and has also officiated as an Inspector on several occasions for different periods till 1937, when he was transferred to the Special Branch temporary staff as an officiating Inspector in a permanent vacancy.

He was posted to the Detective Department in 1910 and quickly made his mark. He has earned the commendations not only of his superior officers but also of magistrates and judges for careful investigation work. He did particularly good work in connection with enquiries regarding foreigners during the Great War. He was posted to the Special Branch in July 1937 since when he has been employed on labour and trades-union work and has been instrumental in the collection of very valuable information.

During the period of his service in the Calcutta Police, this officer has earned 53 commendations and has received 80 rewards. He has also been awarded gold watches on two occasions, has been several times specially commended and was specially mentioned in the Calcutta Police Administration Report for the years 1931, 1932, 1933, 1934 and 1935. Throughout his service his work has been marked by a high standard of devotion to duty.

49. **Captain Henry Cecil John Hunt**, King's Royal Rifle Corps.—Captain H. C. J. Hunt, King's Royal Rifle Corps, joined as a Military Intelligence Officer, Bengal, in 1934, and after some months in Bankura and Chittagong, where he immediately showed sign of promise, he was sent to Nonkhali where his work was of a very high order.

His zeal and sense of duty was so high that he never spared himself or considered his health with the result that he so impaired his health that he had to resign his appointment and proceed on leave.

He rejoined the Bengal Police as Military Intelligence Officer in February 1938 and after working at Rangpur, where he was of great assistance to the Superintendent of Police and made quick and intelligent contact with the local people, he was specially selected to be

sent to the Eastern States Agency for service in the Orissa States after the murder of Major Bazilgettee. On return he was posted to Midnapore, one of the most difficult districts in the province. He has obtained a good working knowledge of the Bengali language—the only Military Intelligence Officer who has—and has a gift for contact with Indians and a flair for work of this nature.

50. **Major William Godfrey Hale**, 5th Marhatta Light Infantry.—Major William Godfrey Hale, 5th Marhatta Light Infantry, joined as Military Intelligence Officer on 4th August 1936, and after some preliminary training in Dacca, was sent as Military Intelligence Officer to Midnapore, one of the most difficult districts in the province. He has been of great help to his Superintendent of Police in the Intelligence Branch of the district, has worked hard and whole-heartedly to obtain and maintain contact with the people, and to inculcate clear and sporting ideas among the schools, in order to counteract revolutionary and undesirable political propaganda. His work as liaison officer on flag murders with the troops was so successful in bringing into touch the local people that his reports on these marches were circulated as an example to all other Military Intelligence Officers.

51. **Khondkar Fazle Siddiq**, Indian Police, Deputy Commissioner of Police.—Mr. Sobhan entered the Police in 1925 and his work throughout his service has been marked by great devotion to duty, marked administrative ability together with initiative and readiness to accept responsibility.

His work as Superintendent of Police, Khulna, in combating terrorist and other subversive activities was marked by all the qualities mentioned above.

He joined the Calcutta Police in November 1937 as Deputy Commissioner, Port Police, and in that capacity ably and tactfully handled a serious strike amongst Dock Labour.

In July 1938 he was put in charge of the North District of the Calcutta Police, always a difficult charge, and is still holding that post. During this period he did conspicuously good work in dealing with an outbreak of communal trouble in Cossipore where his prompt and firm action prevented the trouble from spreading to other parts of the City where, at the time, communal feeling was strained.

Apart from this, he has rendered valuable services to Government in dealing with other serious communal problems which might have led to trouble.

**24-Parganas.**—No. 1173P.H.—23rd July 1940.—In exercise of the power conferred by section 311 of the Bengal Municipal Act, 1932 (Bengal Act XV of 1932), the Governor is pleased to make the following rules for the alteration of the existing house connections given under the metering system so as to conform to the decentralised storage system, in the Garden Reach Municipality in the district of the 24-Parganas:—

#### Rules.

When the Commissioners deem it expedient for the maintenance of an efficient water-supply that existing connections from streets mains to houses with metering system granted under the rules published with notification No. 302T.M., dated the 27th May 1913, as subsequently amended, should be altered so as to make them conform to the Decentralised Storage System, they may direct that such alteration shall be made.

1. The connection after alteration shall consist of two portions—
  - (a) The service-pipe from the street main to the boundary of the holding, including ferrule, stop-cock and check pipes;
  - (b) the storage tank (or tank- with service-pipe connecting to it from the boundary of the holding, also outlet pipes, taps and other accessories as required.
2. The items referred to in clause (a) of rule 1 shall be provided and fixed by and at the expense of the Commissioners, and such pipes and fittings shall remain as their property. If the Commissioners decide to make use of a part or the whole of the existing pipes and fittings, the present value of the same shall be paid to the owner or occupier, such value being determined by the Commissioners.
3. The items referred to in clause (b) of rule 1 shall be provided and fixed at the expense of the owner or occupier and shall be maintained by him in good working order. The tank is to be suitably covered and projected and is to be provided with locked lid, ball-valve stop-valve and overflow-pipe.
4. In the case of connections to which a meter was attached by the owner or occupier prior to the date of introduction of the decentralised storage system provided in these rules the Commissioners shall make a contribution of Rs. 40 towards the cost of the work referred to in clause (b) of rule 1 when such work has been completed to their satisfaction.
5. Each holding must have a separate connection to the municipal main supply-pipe. On application a holding consisting of two or more houses (excluding the outhouse) in one compound may, at the discretion of the Commissioners, be split into parts and each part connected separately to the municipal supply pipe, provided the sum total of the daily supply in all such parts shall not exceed the quantity of water admissible to the holding under rule 10. Extension from the communication-pipe of one holding to another holding shall not be permitted and combination of holdings for the purpose of these rules shall not be allowed.

6. No tapping or branching off of any kind whatsoever of the service-pipe referred to in clause (b) of rule 1 shall be allowed except at approximately the same as that of the ball-valve.

7. The owner or occupier shall not permit the service-pipe, including the items referred to in clauses (a) and (b) of rule 1 or any part thereof, to be altered, removed or interfered with by any person other than an authorised representative of the Commissioners, who shall be empowered by the Commissioners to alter or adjust the service-pipe as may from time to time be necessary for the maintenance of the requisite flow of water.

8. The tank referred to in clause (b) of rule 1 shall be durable and water-tight and the cover overflow-pipe and other accessories shall be so constructed that mosquitoes cannot enter the tank. The ball-valve and other fittings shall be exact duplicates of standard samples kept in the office of the Commissioners and approved by them at a meeting. The storage tank or tanks shall be cleaned and sterilized quarterly at the cost of the owner or occupier by the staff of the Commissioners under the supervision of one of their officers and the said officer shall have the power of locking up the tank or tanks if he thinks so desirable.

9. Every storage tank shall be fitted with an overflow-pipe, the end of which shall project over the wall of the house and shall be placed in a conspicuous position. Discharge of water from the overflow-pipe means that the ball-valve is failing to function, and the owner or occupier shall notify the waterworks officers every time he finds such discharge occurring, and such officers shall, if necessary, rectify the defect with the help of the staff of and with the materials belonging to the Commissioners and charge the cost thereof to the owner or occupier.

10. Every owner or occupier of any holding, in respect of which a connection has been made under these rules, shall be entitled to a supply of water corresponding to the annual valuation of such holding, according to the following table:-

He shall state in his application the number of days for which the connection is required.

13. On receipt of the application, together with the fees as provided in rule 12, the Commissioners shall forthwith instal within the compound and at a level of two feet above ground an additional storage tank (or tanks) of 300 gallons capacity with ball-valve, and two taps fixed to each tank. They shall connect the same to the street main by a service-pipe or pipes, and do all other work necessary to commence and maintain the supply.

The Commissioners shall keep in stock a number of tanks, with pipes, fittings, etc., for the above purpose.

14. The payment referred to in rule 12 shall be made once a week. In case the owner or occupier fails to make the payment weekly, the Commissioners or their officers may at once stop the additional supply of water by cutting off the temporary connection and remove the storage tank or tanks, temporary service-pipe, etc., fixed for such connection.

15. Two or more such temporary connections may be taken, if required, on payment of the additional costs and weekly charges.

16. The Commissioners may cut off the connection between any waterworks of the Commissioners and any holding to which water is supplied from such works, or may turn off such supply, in any of the following cases, viz:—

**24-Parganas.**—No. 1175P.II.—23rd July 1940.—In exercise of the power conferred by section 311 of the Bengal Municipal Act, 1932 (Bengal Act XV of 1932), the Governor is pleased to make the following rules for the regulation of the supply of filtered water to private premises for domestic purposes which may be granted hereafter by the Commissioners of the Garden Reach Municipality in the district of 24-Parganas.

### Rules.

So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may grant to any owner or occupier of a holding paying a water rate imposed under the provisions of Chapter VIII of the Bengal Municipal Act, 1932, on the annual value of such holding, when such annual value is not less than Rs. 100 a connecting-pipe from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only.

1. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes must apply for the same on the printed form A to be supplied free of cost at the municipal office. The conditions subject to which a house connection will be given are set out in the form, and the owner or occupier shall sign the statement undertaking to observe the rules before a house connection will be given. Every house connection shall be taken in hand within three months of its sanction. If a house connection is not taken in hand within the said period the sanction given for it shall be deemed to be revoked and fresh sanction shall be required before the connection is made.

2. A fee of Rs. 75 shall be paid to the Commissioners by such owner or occupier for such connection to a municipal main supply-pipe before any work is commenced, such fee to be in addition to all other costs and charges imposed under these rules.

3. Each holding must have a separate connection to the municipal main supply-pipe. On application a holding consisting of two or more houses (excluding the outhouse) in one compound may, at the discretion of the Commissioners, be split into parts and each part connected separately to the municipal supply-pipe, provided the sum total of the daily supply in all such parts shall not exceed the quantity of water admissible to the holding under rule 10. All such connections shall, for the purpose of rule 2, be treated as separate connections. Extension from the communication-pipe of one holding to another holding shall not be permitted and combination of holdings for the purpose of these rules shall not be allowed.

4. The connection shall consist of two portions—

- (a) the service-pipe from the street main to the boundary of the holding, including ferrule, stop-cock and check-pipes;
- (b) the storage tank (or tanks) with service-pipe connecting to it from the boundary of the holding, also outlet-pipes, taps and other accessories as required.

5. The items referred to in clause (a) of rule 4 shall be provided and fixed by and at the expense of the Commissioners, and such pipes and fittings shall remain as their property.

6. The items referred to in clause (b) of rule 4 shall be provided and fixed at the expense of the owner or occupier and shall be maintained by him in good working order. The tank is to be suitably covered and protected and is to be provided with locked lid, ball-valve, stop-valve and overflow-pipe. The inlet and outlet pipes shall be so laid that they will be protected from the heat of the sun.

7. The owner or occupier shall not permit the service-pipe including the items referred to in clauses (a) and (b) of rule 4 or any part thereof, to be altered, removed or interfered with by any person other than an authorised representative of the Commissioners, who shall be empowered by the Commissioners to alter or adjust the service-pipe as may from time to time be necessary for the maintenance of the requisite flow of water. No tapping or branching off of the service-pipe shall be allowed except at a level approximately the same as that of the ball-valve.

The requisition shall be for a period of not less than one year, and payment shall be made in advance for the whole year at the rate of one pie per 10 gallon of additional water requisitioned.

- (g) For a supply of 1,100 gallons per day—Rs. 2 per day.

He shall state in his application the number of days for which the connection is required.

13. On receipt of the application, together with the fees as provided in rule 12, the Commissioners shall forthwith instal within the compound and at a level of two feet above ground an additional storage tank (or tanks) of 300 gallons capacity with ball-valve, and two taps fixed to each tank. They shall connect the same to the street main by a service-pipe or pipes, and do all other works necessary to commence and maintain the supply.

The Commissioners shall keep in stock a number of tanks, with pipes, fittings, etc., for the above purpose.

14. The payment referred to in rule 12 shall be made once a week. In case the owner or occupier fails to make the payment weekly, the Commissioners or their officers may at once stop the additional supply of water by cutting off the temporary connection and remove the storage tank or tanks, temporary service-pipe, etc., fixed for each connection.

15. Two or more such temporary connections may be taken, if required, on payment of the additional costs and weekly charges.

16. The Commissioners may cut off the connection between any water works of the Commissioners and any holding to which water is supplied from such works, or may turn off such supply, in any of the following cases, viz.;—

And whereas, in accordance with the provisions of sub-section (1) of section 5 of the said Act, the Court of Inquiry has submitted its report to the Governor;

**Report of the Court of Enquiry appointed by the Government of Bengal under section 3(a) of the Trade Disputes Act, 1929 (Act VII of 1929), to investigate the trade dispute between Messrs. Andrew Yule & Co., Ltd., 8, Clive Row, Calcutta, Managing Agents, the New Central Jute Mills, Ghosury, Howrah, and the workers of the Weaving Department of the said mills.**

Mr. A. Z. Khan, District Magistrate, Howrah, was appointed to be the Court of Enquiry under section 3(a) of the Trade Dispute Act under notification No. 2596Com. of the Department of Commerce and Labour, dated 19th August 1939. Mr. Khan took up the enquiry on 4th October 1939, but before he could finish the enquiry his services ceased to be available as he was transferred from Howrah. Under section 10(2) of the said Act I was appointed with effect from 29th November 1939 to be the Court of Enquiry under section 3 of the said Act, *vide* Government of Bengal, Department of Commerce and Labour, notification No. 3785Com., dated 13th December 1939.

The events leading to the appointment of the Court may be briefly summarised as follows.

The New Central Jute Mills are located on the bank of the river Haughly at Ghosury, Howrah, and is managed by Messrs. Andrew Yule & Co., Ltd. In all about 3,000 persons including 500 women are employed in the mills. The number of men in the Weaving Department who are parties to this dispute is 709. There are 709 looms in the

mills. Mr. G. Martin has been the Manager of the mills since 8th October 1938. He took over charge from Mr. Yeaman, who had been officiating as Manager for six months and who on relief by Mr. Martin reverted to his substantive post as a Departmental Overseer in the mills. At the time of the occurrence the Weaving Department was in charge of Mr. George Gibbs. He had been on leave for a few months and took over charge from Mr. John Courtney on 6th May 1939. The other staff in this department consisted of two head sardars, named Kedar and Basir, and several line sardars. The weavers are paid weekly and their average weekly earning varies between Rs. 7-8 and Rs. 10.

The present trade dispute arose out of the stoppage of work by the weavers on the afternoon of Wednesday, the 17th May 1939. For some months prior to that date, it is alleged that the weavers had been complaining of short supply and bad quality of yarn. It is alleged that there was a falling off in their income for these reasons. It is alleged that the stock of yarn ran so short that the men had often to wait for a long time to get the supply of yarn. There are only two windows in the cops godown from which the cops were supplied. On account of the shortage there was a scramble for the yarn and the weavers had to fight their way up to the cops godown to get the yarn. It is alleged that the weavers complained from time to time to the line sardars, the head sardars and the European overseer of the Weaving Department, apparently without much relief. On the 16th May in course of the scramble for the yarn one of the weavers, named Nagen, received injuries on his person. This incident led the weavers to decide to stop work for half a day so as to enable the Spinning Department to produce sufficient surplus stock of yarn. It is alleged that the daily outturn of the yarn at the Spinning Department was just enough to meet the demands of the Weaving Department. On behalf of the weavers it is said that they came to the decision at some financial sacrifice only to preserve peace and amity among the weavers. They intimated their decision to the line sardars, the head sardars and through them to Mr. Gibbs, the departmental overseer. Mr. Gibbs, however, asked the men not to stop work for half a day and he assured them that the supply would improve. This assurance, however, failed to convince the weavers and they acted according to their pre-arranged plan and stopped work on the afternoon of Wednesday, the 17th May 1939. The weavers say that they did not work at all on this afternoon, while the management contends that some men worked for about five minutes and then stopped the work at the instigation of two men, Nagendra Nath Neogi and Kallan Khan.

On the morning of the 18th the weavers turned up as usual for work. They found sufficient supply of yarn and started work. Soon after, the departmental overseer Mr. Gibbs directed Nagen and Kallan Khan to go to the office and receive their wages and told them that they had been dismissed. The other weavers came to know of this dismissal and stopped their work. It is said that whenever they stopped work the Manager usually came to enquire into the cause of the stoppage. The weavers thought that on this occasion also if they stopped work the Manager would come and they would enquire about the cause of dismissal of Nagen and Kallan and request him to reinstate them. The Manager, it is alleged, did not come. At 11 a.m. they went out with the workers of the other departments intending to come back when the whistle was blown at 1-30 p.m. It is

alleged that no whistle was blown on that day and when the weavers came back they found the gates closed. From the 18th to 23rd May, the men remained absent from work. During this period Khan Sahib S. A. E. B. Murshedi, Assistant Labour Commissioner, addressed the strikers at a meeting and persuaded them to resume work unconditionally without the two dismissed men.

On behalf of the weavers an application was made to the Government by Maulvi Shafaatullah Khan under section 3 of the Trade Dispute Act with the prayer that the dispute between the workers and the management be referred to a Court of Enquiry. A Court of Enquiry was accordingly appointed with the direction to enquire into and report on the circumstances leading up to and the causes of the strike at the New Central Jute Mills at Ghumury on Wednesday, the 17th May 1939, and in particular to report—

- (1) Whether the yarn used in the mill was of satisfactory quality.
- (2) Whether there was any shortage of yarn, and if so, whether adequate steps were taken by the mill authorities to increase the supply.
- (3) Whether the summary dismissal of the two workers in connection with the strike was justifiable, and if not, what lesser punishment, if any, would have sufficed, and what compensation would be suitable if the men are not re-employed.

Mr. A. Z. Khan commenced the enquiry on 4th October 1939. The written statement of the weavers was already on record and the written statement on behalf of the New Central Jute Mills was filed on 6th October 1939.

Mr. Khan examined three witnesses and I examined the rest of the witnesses on behalf of the weavers and all the witnesses on behalf of the management. In all seven witnesses were examined for the weavers and seven for the mill. Mr. Murshedi was examined as a Court witness. On 8th January 1940, I visited the New Central Jute Mills at Ghumury. The parties by mutual agreement were not present at the inspection. I went round the mills and questioned men of various sections; then I went to the mill office and saw some papers from the Manager.

The representatives of the workers were given full opportunity to examine the registers produced by the management. The arguments were heard on the 16th January 1940. At the enquiry, the Company was represented by Mr. P. C. Mallick, Advocate, Howrah, Mr. G. Martin, Manager of the New Central Jute Mills. The weavers were represented by Mr. Mohiuddin Khan, Barrister-at-law and Mr. M. Shafaatullah Khan.

I am grateful to the representatives of both parties for the help they rendered to me for coming to a decision. The Company very kindly supplied me with all records and other information that were asked for. I take this opportunity of thanking them for their cordial co-operation.

I shall now take up each of the issues separately.

1. *Quality of the yarn.*—On this point the case for the weavers is that the quality of the yarn at times was very bad and that they complained about it very often. The case for the Company, on the other hand, is that the quality of the yarn was not bad but was uniformly of the quality used before. In support of their case the Company have referred to the reports of Testing Officers of the Government of Bengal. It appears that the Company had entered into a contract with Government for supplying some sandbags for war purposes. Periodical tests as to the quality of the yarn were made every two or three weeks. Government Inspectors came to the mill, took up a few pieces of hessian cloth, cut and took them away and tested them. The mill authorities did not select the cloth for testing. These test reports show that the yarn was of standard quality. These test reports cannot be brushed aside. On behalf of the workers it has been argued that as the samples were taken by Government Inspectors only periodically at an interval of two or three weeks, their reports at best show that on those days the quality of the yarn was good. On other days the quality might have been bad as alleged by the weavers. It seems to me to be too much of a coincidence that the yarn would be found of good quality on all the days when samples were taken by Government Inspectors. The conclusion seems to me that there was nothing particularly wrong with the quality of the yarn. On the other hand all the witnesses on behalf of the weavers say that the yarn was bad. That the weavers occasionally complained about the bad quality of the yarn is admitted by some of the witnesses examined on behalf of the Company although they deny that there was any truth in these complaints. Muhammad Basir, one of the head sardars, has stated. "The weavers had complained to me about the quality of the yarn. I reported the matter to Mr. Gibb. When there was such a complaint the matter was looked into and the quality of the yarn improved". Kedar Giri, the other head sardar, says: "The quality of the yarn produced is not always uniformly good. Sometimes it is good and sometimes bad. Since Mr. Martin came as Manager there has been no particular deterioration of quality". He also says: "Immediately before the strike the quality of the yarn might have been bad".

Basir Sardar further says: "The weavers used to take out roots and specks from the yarn and show them to the *Sahib* in a heap". Mr. Gibb, the overseer for the Weaving Department, admits that "in all mills usually the specks and roots are collected by some of the weavers and laid on the table of the overseer in charge". Mr. Gibb's statement would show that roots and specks are often found in the yarn and the finding of such roots and specks does not necessarily mean that the yarn is worse than the usual quality. The evidence of the two head sardars examined on behalf of the Company seems to me to represent the correct state of affairs. It appears that the quality of the yarn varied to some extent, but that this variation was usual. When complaints about quality was made there was an improvement in the quality. It is to the interest of the Company that the yarn should be of good quality. If the yarn be bad the finished product would be of poor quality. In a competitive market the sale of the finished product would also be affected. It is therefore very probable that the Company did not willingly allow the quality of the yarn to deteriorate. Complaints had no doubt been made for some time past about the quality of the yarn. Mr. Martin, the Manager, stated that some autoclaves were installed on the breaks and he had removed certain

intermediate cards. The autocoyles arrived in December 1938, and the first autocoyles were fixed on 12th May 1939. It has been argued that the removal of intermediate cards might have led to defective carding. The deterioration of the quality of yarn might have been due to such defective carding. There is thus a possible reason for bad yarns. But whether it was actually the cause is more than what we know. In view of the Government test reports, I would therefore hold that the yarn used in the mill was generally of satisfactory quality. It might have varied in quality at different times, but there is no evidence of any such abnormal deterioration in quality which by itself would justify a strike.

2. *Alleged shortage of yarn.*—The Company deny that there was any serious shortage of yarn though they admit that there has been a certain amount of delay in supplying the yarn. Mr. Martin, the Manager, admits that "there was a slight shortage of yarn at the beginning of the week when the strike occurred". But he goes on to say that on Monday he came to notice this shortage as he found ten to twenty men waiting for cops at the cops godown. He took steps to remove the causes which led to the shortage of the yarn, and he says that on Tuesday afternoon the number of men waiting for cops was reduced to from six to twelve and on Wednesday the situation became normal. He also says that he received the complaints of the weavers about shortage of yarn on Tuesday through their sardars as also through Mr. Gibb. Steps had already been taken before receiving these complaints to improve the supply. The Manager also says that shortage of yarn is a common complaint and that there never was a strike for shortage of yarn even when the shortage was much more serious. He also gave some of the reasons for this temporary shortage of yarn. From the statement of Basir and Kedar Sardar, however, it would appear that the same shortage continued even on Wednesday. Kedar said that on Wednesday morning ten or twelve persons had to wait for cops for 5, 10 or 30 minutes. If this be a fact, and I see no reason to doubt it, things had not returned to normal even on Wednesday. In course of argument the learned advocate for the Company produced before me an extract from production book for the following three periods, viz.—

- (i) 27th August 1938 to 1st October 1938 (before Mr. Martin came).
- (ii) 15th October 1938 to 19th November 1938.
- (iii) 8th April 1939 to 13th May 1939.

From the figures it would appear that weekly production of cops during the period 15th October 1938 to 5th November 1938 was more than that in the period before Mr. Martin joined as Manager. But during the same period there was a fall in the weekly production of cuts. From this fact the learned pleader argued that weekly production of cuts does not depend on the weekly production of cops. The low production of cuts in spite of more than standard production of cops, it is argued, goes rather to support the Manager's suspicion that the weavers had conspired to discredit him before the Company by continued low production and to have him removed. I quite agree with the learned pleader as to the first part of this argument, viz.,

that weekly production of cuts does not depend on the weekly production of cops. The weekly production of cuts depends on the supply of cops and the supply includes not only the weekly production of cops but also the previous stock of cops if any. It is the case of the weavers that the previous stock of cops had been exhausted and the weekly production of cops was not quite adequate for their demands. Kedar Sardar has supported this view when he said that shortage of yarns was due to the fact that the previous stock of cops had been exhausted and also because of the manufacture of sandbags. The statements filed on behalf of the Company are therefore misleading. If they wanted to prove that there was no shortage of cops they should have submitted a statement showing the total stock of cops during these weeks. But the Manager said that no such information was available. The deduction that the low production of cuts indicates some conspiracy on the part of the weavers cannot therefore stand scrutiny. This statement however is very important as it shows that the weekly production of cops fell for the weeks ending 12th November 1938 and 19th November 1938. The figures for the months of December, January, February and March are not however shown in the statement. The weekly production improved from the beginning of April and became normal again in the week ending 29th April 1939. But the weekly production of cops for the week ending 6th May 1939 and 13th May 1939 (immediately before the strike) had a big drop. We don't know what exactly was the stock during these months. But the Manager admits that at the time of the strike there was no surplus stock. It is therefore reasonable to assume that if there had been any surplus stocks that had been gradually used up during these months. The normal weekly production of cops was therefore either not quite adequate for the demands of the weaving department or it was just adequate to meet the demand. If the normal weekly production of cops was more than adequate for the demand a surplus stock could have accumulated. As there was no such surplus the normal weekly production of cops could not have been more than enough for the Weaving Department. That being the position whenever the weekly production of cops fell below normal there would be shortage of cops. This was so during the week ending 6th May 1939 and 13th May 1939. From the figures supplied therefore it would appear that there was shortage during the period immediately preceding the strike. The total number of cuts produced have been given in this statement, but their width has not been given. It has been argued that the number of cuts is not of any use. Different classes of the cloth had different width, and on behalf of the weavers much stress has been laid on this point. They argued that as the width had not been given it can't be said if the production in the Weaving Department was above or below normal. I don't however place much importance on this argument. I take it that the width is the same for the figures of all the weeks.

The Manager says that the shortage was temporary and was due to the fact that more yarn was being taken up for sandbags. Also there was admittedly a breakdown of three machines in the Spinning Department between the period from Saturday, the 13th, to Monday, the 15th May 1939. The Manager denied that there was any shortage on Friday and said that the slight shortage on Saturday was due to ordinary week-ending dislocation (machinery cleaning, etc.), and that

it indicated nothing. The mill was then working 45 hours a week and perhaps the Manager made a mistake when he denied the shortage on Friday. If there was no work on Saturday the week-ending dislocation must have been on Friday. This is however a minor point and has a importance for the purpose of the present enquiry, though the representatives of the weavers wanted to make much of it. If the explanation of the shortage of yarn be as stated by the Manager it would appear that one of the causes of the shortage was not really temporary in nature. A breakdown of three spinning machines may be a temporary cause. But if the manufacture of sandbags was consuming more yarns and that was one reason of the shortage, I can't say that the shortage would be temporary. From the statements filed by the Company it appears that sandbags were being manufactured from February 1939. In February 117,000 sandbags were made, in March 380,000 and in April and May 540,000 were made. I was told that a considerable quantity of yarn is used for sewing sandbags and hence there was some shortage of yarn. This effect of the manufacture of sandbags must have been felt from February, and in April and May the shortage must have been quite appreciable. It does not appear that the management had taken any steps to increase the supply of the yarn. The weekly production of cops had fallen and on top of this there was the breakdown of three spinning machines. The result of all this was the shortage of yarn and consequent scramble for yarn near the cops godown.

Khan Sahib Altafuddin Khan said that the workers had at first only complained of the quality of the yarn. Mr. Martin then came and said that the workers had complained of shortage of yarn. The weavers then said that they had complained about the short supply as well as the bad quality of the yarn. From this it has been argued that neither of these complaints were genuine. From the discussion of the evidence there can be no doubt that there was a considerable shortage of yarn. The Manager and all the other witnesses for the Company say that the weavers had complained of short supply of yarn. It is not, therefore, clear why the weavers would tell a different story to Khan Sahib Altafuddin Khan. It seems there was some misunderstanding. The Khan Sahib also says that on the 17th evening Mr. Martin met him in his quarters and that Mr. Martin had then told him that the workers had gone on strike on the allegation that the yarn was bad and that at that time he did not say anything about the allegation of shortage of yarn. There must have been some mistake on the part of the Khan Sahib. It is most improbable that Mr. Martin had not told him about the allegation about the shortage of the yarn. This witness thus appears to contradict both the weavers and the Company. He has probably forgotten the incident and I place no reliance on this evidence.

I therefore conclude that there was a shortage of yarn and that there is no evidence to show that any steps had been taken by the management to increase the supply.

*Causes of the strike.*—Having discussed the two main allegations of the weavers I am now in a position to discuss the circumstances leading to and the causes of the strike. There was no doubt a shortage in the supply of yarn. As a result of this shortage the weavers had to wait

for some time before the cops godown for the yarn. This class of people have not the training to stand in a queue in an orderly manner. Naturally there was a scramble for the yarn and the stronger among them managed to get the yarn earlier. The workers naturally did not like this state of affairs. It is probable that in course of the pushing and jostling Nagen received some injuries. This man looked much weaker than the other workers. Kedar also says that he saw some swelling on the face of Nagen. The weavers did not find that any steps were being taken by the mill authorities to increase the supply of the yarn. It is therefore probable that they decided that the only way of increasing the supply of yarn was to stop work for some time so that a surplus stock of cops may be accumulated. Apparently they were not intelligent enough to see that this course of action would affect the other departments up to the finishing stage. I do not think that they meant to go on strike for any length of time. This is clear from the fact that all of them turned up for work on Thursday morning. That they had communicated their decision to the management is admitted by Kedar, Basir, Mr. Gibb and Mr. Martin. Mr. Martin came to know of this decision on Wednesday forenoon and Mr. Gibb came to know of it on Tuesday morning. It is indeed very strange that although Mr. Martin and Mr. Gibb came to know of this intention nothing was done by either of them to convince the workers about the difficulties and persuade them to continue the work. Both Mr. Martin and Mr. Gibb merely told the weavers that this taking of a half holiday could not be allowed. Mr. Martin says he took much pains to explain the position to the weavers when they stopped work at 1-30 p.m. on Wednesday. It would have been far more prudent if such a step had been taken earlier. The weavers had already made up their mind and it is doubtful if they could even hear Mr. Martin when he spoke. Mr. Martin himself says that as the shafting was running all the weavers could not hear him and so he spoke to them at two places. Even then I doubt if they heard him. When I visited the mill I tried to speak to the weavers individually and it was with the greatest difficulty that I could make them hear me. The difficulty would be much greater when an attempt is made to speak to them collectively. Any way the weavers did not listen to his advice. The main reason for stopping the work (which is tantamount to going on strike) on 17th May is the genuine dissatisfaction among the weavers on account of shortage of yarn. The fact that the quality of the yarn was occasionally bad might have been a contributory cause, but I don't think that they had any serious grievance on this score.

The workers would not, I think, have stopped work so hastily, if there had been a well defined method of approaching to the manager and if the grievances had been properly enquired into and remedied.

The cause of the strike on the 18th is entirely a different one. That point is, however, outside the scope of the present enquiry. There is no question that the strike on the 18th was out of sympathy for the two dismissed men, Kallan Khan and Nagendra, who, the weavers thought, had been wrongly dismissed.

3. *Dismissal of Kallan Khan and Nagendra.*—It is next to be considered whether the summary dismissal of Kallan Khan and Nagendra was justified. On this point Mr. Martin has said that their dismissal

was not summary as an enquiry had been held by him. From his statement it would appear that Mr. Courtney, Basir and Kedar had spoken against Nagendra and that Messrs. Watson, Courtney and Gibb as also Basir and Kedar had spoken against Kallan Khan. Basir and Kedar however did not say anything against either Kallan Khan or Nagendra. Their evidence rather goes to support the statement of the weavers. Mr. Martin had no personal knowledge about what Nagendra or Kallan Khan did, and he admitted in cross-examination that he did not question Basir and Kedar about Nagendra and Kallan Khan. Against Nagendra the only evidence therefore is that of Mr. Courtney and that against Kallan Khan is the evidence of Messrs. Watson, Gibb and Courtney.

Mr. Courtney says that on 17th May 1939 at 1-30 p.m. he was working in the Batching Department which is close to the Weaving Department. He found that some looms adjoining the Batching Department were working. They stopped work within about 5 minutes. He saw Nagendra waving his arms in a manner which showed that he wanted the men to stop work. When the men did not stop work Nagendra went round the looms and set all the handles forcibly to stop the looms. The men restarted the looms but Nagendra again went round the looms and stopped them once more. He cannot say whether anybody else in the Batching Department saw Nagendra setting off the handles. Among the 709 weavers Mr. Courtney says that he could name only five other weavers besides Kallan Khan and Nagendra, but he does not give any reason for knowing Nagendra and Kallan in particular. Mr. Martin had stated in his examination-in-chief that Nagendra was working in the earlier part, but in cross-examination he says he did not see Nagendra working. He has also said that they had nothing against Nagendra in the past. Nagendra himself denies any responsibility for the stoppage of the work and he says he came to know of the decision to stop work only at 1-30 p.m. when he was going to the looms. He saw everyone of the weavers coming away and he too came away. He was not cross-examined on this point. On behalf of the Company it has been made out that Kallan Khan and Nagendra were the leaders who organised this strike. If that is so it is not understood why Nagendra himself would be working at the earlier part. It is equally improbable that if Nagendra was a leader, men round about him would be working. If Nagendra had been waving his hands and stopping the looms it is also surprising that no other witness was available to prove this fact. Mr. Courtney admits that he knew only seven weavers out of a total of 709. It is therefore not imprudent that he might have made a mistake about the identity of the men. Nagendra looks a weakling and if the other weavers who were working did not really want to stop work I doubt if they would have allowed such a man to shut down the looms. The evidence that has been adduced to prove the allegation against Nagendra seems to be very doubtful.

Against Kallan Khan Messrs. Gibb and Watson say that he was waving his hands and he told Mr. Watson "Ham Kal Bundh Karnay Atn—Bahar Lay Jata" (I have come to stop the mill and I am taking out the men). Kallan Khan denies having said so. He denies having had any talk with Mr. Watson. This obviously cannot be the truth. Even in the statement of the nature of dispute filed by Maulvi Shafaatullah Khan it is admitted that there was a conversation between

Mr. Watson and Kallan Khan and that Kallan Khan had said "Hamlog Kam Bundh Keya" (We the workers have stopped the work). Kedar and Basir, the two head sardars, said that Mr. Watson enquired of Kallan Khan if he had stopped the work. Kallan Khan denied having stopped the work. There was an altercation and Kallan Khan said "Ap Bolta Hai To Hami Bundh Keya" (If you say so, then I have stopped the work). Neither Mr. Gibbs nor Mr. Watson says what was the occasion for Kallan Khan to tell Mr. Watson that he had come to stop the work and to take out the men. This statement obviously was made after Mr. Watson put some question to Kallan Khan. Mr. Watson admitted in cross-examination that he did not know Hindustani sufficiently well to know the difference between the interrogative, the affirmative and the exclamatory expressions. The learned counsel has said that the words "Ham Kal Bundh Karnay Ata, Bakar Lay Jata" might have been said by Kallan Khan to show his surprise at such an allegation. Anybody who knows the language will admit that such an interpretation is possible. The affirmative, the interrogative and the exclamatory statements would be the same, only they would be spoken in a different tone and manner. If a person cannot distinguish the tone and manner no value can be placed on his evidence. If Kallan Khan had really used the words by way of surprise it would mean something like this "Have I come to stop the mill?" "Am I taking the men out?" It would then be really tantamount to a denial of the allegations. Mr. Gibbs says that he remembers the exact words spoken by Kallan Khan, but he does not remember the exact words spoken either by Mr. Watson or by Mr. Martin, though he remembers the gist of what was said. He has not given any special reason for remembering the words spoken by Kallan Khan. The two sardars, who understand Hindustani, have not supported Messrs. Gibb and Watson. In the circumstances it is difficult to say whether there might not have been some misunderstanding. It seems hardly probable that any worker even in a moment of excitement would admit his responsibility for causing strike when he knows that he might be punished for this action. The other allegation against Kallan Khan is that in November 1938 he had been responsible for stopping the work. Mr. Martin says that on that occasion he had warned Kallan Khan. The circumstances of that stoppage of work are not known, but it is not clear whether Kallan Khan was really responsible for that stoppage. Mr. Courtney in his evidence says that Kallan Khan was responsible for that stoppage because he was waving his arms in a manner to show that the people should follow him. It is possible that Kallan Khan might have taken some leading part in that strike. Another allegation against Kallan Khan is that on one occasion in the past he had brandished a knife at Mr. Courtney. It appears that Kallan Khan had gone on leave and came back and wanted to join before the expiry of his leave. Mr. Courtney asked him to go out, but Kallan Khan pushed him out of the way. Mr. Courtney returned the push and then Kallan Khan brandished the knife in front of him. After that he was allowed to work. There is no other witness except Mr. Courtney to prove this allegation. He did not even report the fact at the time to anyone. Neither the mill sardars nor anybody else say anything on this point. The story if true would show a total lack of sense of discipline. A worker by threatening an overseer is allowed to have his own way. It is difficult to understand why Mr. Courtney allowed Kallan Khan to work after he had been threatened in this fashion. Both these

incidents, however, refer to the past conduct of Kallan Khan. No doubt past conduct may and should be considered in assessing punishment. But if the principal allegation against him is not fully proved he cannot be punished only on account of his past conduct. If the allegation that he stopped the work on the 17th of May is not free from doubt, I do not think that his past conduct would be material for the purpose of this enquiry.

In this connection the subsequent conduct of Nagendra and Kallan Khan also deserves consideration. From the evidence of Khan Sahib S. A. E. B. Murshedi, the Assistant Labour Commissioner, it appears that the weavers were unwilling to resume work leaving behind two of their comrades whom they considered to have been unjustly dismissed. Khan Sahib Murshedi talked with Nagendra and Kallan Khan and asked them to advise the weavers to go back to work. Nagendra and Kallan Khan readily complied with his request. If Nagendra and Kallan Khan were really the leaders of the strike it is unlikely that the weavers would resume work without them. At the same time if Nagendra and Kallan were bent on creating trouble they would not have complied with the request of Mr. Murshedi. This circumstance can be explained only if it is believed that the workers had gone on strike on the 18th out of sympathy for Nagendra and Kallan Khan and not at their instigation. There is no allegation from the Company's side that Nagendra and Kallan Khan took any part in inciting the weavers to stop work on the morning of the 18th. The weavers stopped their work of their own accord. If Nagendra and Kallan had really organised strike on the 17th and if Kallan Khan had gone so far as to admit having done so, it is not understood why they did not try to stop the work on the 18th. Their conduct subsequent to the strike on the 17th seems therefore to be in their favour.

Even assuming that Kallan Khan and Nagendra had taken a leading part in stopping the work on the 17th, it is a matter for consideration whether they can be victimised for having done so. There is no evidence to show that the strike was organised under outside influence. From what I have found they stopped work on account of the genuine dissatisfaction for shortage of yarn. There was no properly organised union prepared to act constitutionally. The weavers had admittedly brought their grievance to the notice of the Manager through their sardars and the departmental overseer. As these representations have had no effect they decided to stop work. It is the weavers' case that all of them in a body decided to stop work. Even assuming that Kallan Khan and Nagendra suggested such stoppage of work and the other weavers followed their advice, I do not think that they should be penalised for this act. In all trade disputes unless there is a properly organised trade union, some of the workers must take a prominent part. When the grievance is genuine such workers ought not to be penalised. The punishment of dismissal therefore appears to me to have been unreasonably severe.

Mr. Martin has admitted that he gave no opportunities to Kallan Khan or Nagendra to explain their conduct. He did not even call for their explanation before dismissing them. I find that there are no rules about dismissals though I find a list of acts and omissions approved under section 8(1) for which fines may be imposed. It seems rather

strange that although there are some rules about imposing fines there are no rules about dismissal. There ought to be some well defined rules for dismissals as well. On general principles dismissal should be as rare as possible and should be made for the gravest offences. Before dismissal a man should be given an opportunity of presenting his case and there should be a regular finding in which reasons for dismissal should be given. It is also desirable that before taking the extreme step of dismissing a worker he should be given an opportunity of rectifying his defects by warning, by fining and if necessary by suspension. On this occasion nothing like such a procedure was followed. Mr. Martin says that he made some enquiries from his overseer and he was convinced of the necessity of dismissing these men. He admits that he had nothing against Nagendra in the past and says that he had warned Kallan Khan once before. If a proper enquiry had been held by Mr. Martin and explanations taken from Nagendra and Kallan Khan, I doubt very much whether he would have found it necessary to dismiss them. From what I have seen I do not think that they have been rightly dismissed. If for the purpose of maintaining discipline it was thought that some punishment must be given, I think it would have been sufficient if they had been fined or suspended. But as I have already stated before, I do not think that the men should have been punished at all when there was a genuine grievance.

Next it has to be decided as to what compensation would be suitable if the men are not re-employed. From Mr. Martin's statement in answer to Court question it appears that there is no contract of employment with the labourers. The conditions of service are therefore not known. This is rather unsatisfactory. In my opinion there ought to be some well defined conditions of service laid down. In the absence of any such conditions of service, the question of compensation, if the men are not re-employed, will therefore have to be decided on general principles of equity. Both these men have put in quite a long time in the service of the Company. Having been discharged from a mill, managed by so well known a Company as Messrs. Andrew Yule & Co., Ltd., it is doubtful if they can find another job soon. In case of a discharge it is usual in most jobs to allow one month's wages for every year of service. These men are paid every week and their weekly wages are not constant. Their average weekly earning during a year prior to May 1939 may be determined, and I would recommend that if they are not re-employed they may be paid four weeks' wages for every year of service in the mill.

RESOLUTION No. 7273For.

*Calcutta, the 20th July 1940.*

It has been represented to Government that facilities for grazing cattle in the district of Chittagong are inadequate, and it has been suggested that portions of the protected forest which are situated near villages should be disafforested and made into village grazing grounds with free grazing facilities. The difficulty is to ensure that such grazing grounds would not rapidly deteriorate and become ineffective for the purpose for which they were intended. Government have, therefore, decided to appoint a Committee consisting of officials and non-officials to examine and advise upon the feasibility of the suggestion and on the best method of carrying it into effect.

2. The terms of reference of the Committee will be as follows:—

With a view to make available for the purpose of cattle grazing, the growing of fodder crops, or other suitable purposes parts of the protected forests of the Chittagong Collectorate containing no suitable forest produce which have been or are being disafforested;

(a) What policy should be adopted with regard to these lands, and other hilly areas in the khas mahal in order that the most productive use may be made of them for the benefit of the khas mahul tenants;

(b) In particular whether any part of such lands should be set aside for use as village grazing grounds and, if so, how they could be best preserved as such and their deterioration prevented;

(c) Whether such areas should be handed over to the management of local bodies and, if so, on what terms and conditions;

(d) What are the prospects of making use of portions of these lands for other purposes than grazing, such as the growing of fodder crops, or the cultivation of fruit, and what would be the best method of management for such purposes.
